No. 1 Grade..... POSTPAID
Description Opposite Page

MA5021—PEACE. The most popular and greatest rose of the last decade. Enormous flowers starting from rich golden buds and changing to soft yellow with distinctive pink edging on the curled petals. Immense canes bear as many as 5-6 blooms at one time. High 9.6 rating. Peace has every desirable feature you could ask in a perfect rose. Plant Pat. 591. Heavy select No. 1 Canes. Ea. **\$2.50**; 3 for **\$6.60** POSTPAID.

MA5004—CHRYSLER IMPERIAL. Truly the King of the Red Roses. Perfect form both in bud and full bloom. Enormous, velvety-textured flowers are rich, deep crimson with a pleasing spicy fragrance. Strong caned, vigorous, free-blooming plants. A perfect all-purpose rose. Plant Pat. 1167 heavy select No. 1 Canes. Each **\$2.50**; 3 for **\$6.60** POSTPAID.

MA5024—KORDES PERFECTA. Sensational European rose introduced in 1959. Spectacular blooms are entirely different from any rose. Creamy-white petals with artistically curled edges of glowing crimson. Very double blooms measure 5" across. Strong plants. Flowers seem to change color as they open. Kordes Perfecta should be in every rose garden. Delightfully fragrant. Plant Pat. 1604. Heavy Select No. 1 Canes. Ea. **\$3.50**; 3 for **\$9.30** POSTPAID.

MA5014—HELEN TRAUBEL. Long, perfectly shaped buds of sparkling carnation pink open into huge 6" blooms. Large curled petals of warm pink blend to rich apricot at the base. Extremely sturdy, vigorous plants with long, slender stems. Free blooming even in the hottest part of the summer. Plant Pat. No. 1028. Heavy select No. 1 Canes. Each **\$2.75**; 3 for **\$7.20** POSTPAID.

MA5027—PINK PEACE. Deep, satiny pink, very double blooms, are borne in profusion throughout the season. Extra large blooms are refreshingly fragrant. Outstanding in both color and form and will no doubt become as popular as Peace. The finest of the pinks. Plant Pat. 1759. Heavy Select No. 1 Canes. Each **\$3.00**; 3 for **\$7.95** POSTPAID.

MA5028 — GOLDEN MASTERPIECE. This appropriately named beauty is truly in a class by itself. No other yellow rose compares in size, color or form. Long, perfectly shaped buds, open into enormous rich yellow, long lasting blooms. Showy, non-fading and colorful. Excellent for cutting. Plant Pat. 1284. Heavy Select No. 1 Canes. Each **\$3.00**; 3 for **\$7.95** POSTPAID.

MA5079—KARL HERBST (Red Peace). Sensational new introduction so similar in form and habit to the Pink Peace that it is commonly called European Red Peace. Brilliant Red Blooms of enormous size are borne on long, strong stems. Rich glossy foliage. The reddest red of all the hybrid tea group. Karl Herbst is included in our special Peace Collection No. MA5228. Heavy Select No. 1 Canes. Each **\$2.50**; 3 for **\$6.00** POSTPAID.

MA5046—WHITE KNIGHT. The aristocrat of the Hybrid Tea class. Clean and refreshing pure white blooms highlight any rose garden. Long, tapering buds open into perfectly formed, high-centered blooms, the outer petals artistically curled. Medium height plants are vigorous and sturdy. Plant Pat. 1359. Heavy Select No. 1. Canes. Each **\$3.00**; 3 for **\$7.95** POSTPAID.

MA5008—GOLDEN SCEPTRE. Another European introduction. Rich, golden-yellow, non-fading blooms of extra size with 55-60 petals in the 5"-6" blooms. High centered well shaped flowers hold their petals well even in hot weather. Clean, bright colorful foliage. Vigorous tall bushes. Plant Pat. No. 910. Heavy Select No. 1 Canes. Each **\$1.85**; 3 for **\$4.95** POSTPAID.

MA5015—NEW YORKER. A favorite among rose fanciers and commercial growers. Velvety scarlet, showy blooms are produced in abundance. Delightfully fragrant. Long lasting flowers excellent for cutting and arrangements. Plant Pat. 823. Heavy Select No. 1 Canes. Each **\$2.50**; 3 for **\$6.60** POSTPAID.

MA5005—STERLING SILVER. A new different rose color—novel and unusual yet beautiful beyond description. Warm, silver lilac flowers from perfectly formed pink and lavender buds. Equally enjoyable in the garden or vase. Heavy, pleasant fragrance. Medium height bushes heavily foliaged. Vigorous grower. Plant Pat. 1433. Heavy Select No. 1 Canes. Each **\$3.00**; 3 for **\$7.95** POSTPAID.

MA5003—FORTY NINER. Brightest and best of the Bi-colors. Petals are brilliant red on the face and rich gold on the reverse side. A striking combination of gay cheerful colors. Extra long stems with large 4"-5" flowers. Long lasting for bouquets. Plant Pat. 792. Heavy Select No. 1 Canes. Ea. **\$2.50**; 3 for **\$6.60** POSTPAID.

MA5031—TIFFANY. All American Winner. Bold, rich pink flowers with warm gold shading at the base of each petal. Near perfect rose form with long pointed buds and curled outer petals when fully open. An unusual color that stands out from other pink. Upright, well branched plants. Plant Pat. 1304. Heavy Select No. 1 Canes. Ea. **\$2.75**; 3 for **\$7.20** POSTPAID.

CLIMBING ROSES

5107—IMPROVED BLAZE. The most popular of all the climbers. An extravaganza of fiery red color from hundreds of brilliant blooms. A spring blooming type that is extra vigorous and hardy. Makes an amazing growth in just a short period of two years. Bright red blooms do not fade even in the hottest summer weather. Heavy select No. 1 Canes. Each **\$1.39**; 3 for **\$3.95** POSTPAID. Select No. 1½ Canes. Each **\$1.15**; 3 for **\$3.25** POSTPAID.

5114—GOLDEN SHOWERS (Pat. 1557). An All America selection in 1957. Bright golden yellow buds and blooms from early spring until late fall. Extra heavy strong canes that make the plant almost self-supporting. Long almost thornless stems ideal for cutting. Attractive dark green glossy foliage. Heavy Select No. 1 Canes. Each **\$2.75**; 3 for **\$7.20** POSTPAID.

5105—DR. J. H. NICOLAS (Pat. 457). Perfectly shaped large fully double pink blooms. Flowers from late spring until frost. Very fragrant. Blooms often measure 5 to 6 inches across. Normally blooms the first year. Most anyone can find a spot for a rose of this type in your garden. Heavy Select No. 1 Canes. Each **\$1.39**; 3 for **\$3.95** POSTPAID. Select No. 1½ Canes. Each **\$1.15**; 3 for **\$3.25** POSTPAID.

6 MOST POPULAR HYBRID TEA ROSES

MA5050—CRIMSON GLORY. A favorite and dependable hybrid tea. Velvety dark crimson color with beautifully formed large sized blooms. Long strong stems for excellent cutting. One of the most beautiful roses that you can have in your garden.

MA5047—THE DOCTOR. Enormous silvery pink blooms. Unusually well formed buds. A very fragrant beautiful rose that deserves a place of prominence in your garden.

MA5010 — CHARLOTTE ARMSTRONG. Commonly known as queen of the light reds. Exquisite buds and high centered blooms of cerise to light red. Provides lots of blooms all summer long. One of the tallest growing Hybrid teas with unusually long cutting stems.

Heavy Select Grade No. 1 Plants. Each **\$1.39**; 3 for **\$3.95** POSTPAID.
Select Grade No. 1½ Plants. Each **\$1.15**; 3 for **\$3.25** POSTPAID.

MA 5061—ECLIPSE. A beautiful glittering yellow rose with unusually well formed long tapered buds. Heavy blooming from June throughout the summer. Brilliant unfading blooms with remarkably long sturdy stems.

MA 5068—McGREDY'S IVORY. Large soft velvety white blooms with just a touch of lemon in the center. Beautifully formed buds on very sturdy stems. Considered by many growers to be the finest white rose. Pleasantly fragrant.

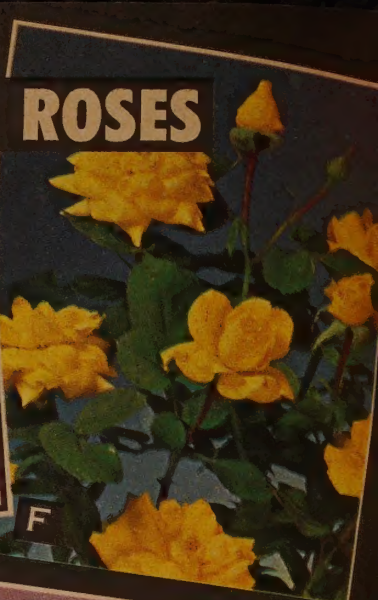

MA 5056—CONDESA DE SASTAGO. A beautiful two-toned rose with fiery copper inside and a warm yellow gold on the underside of the petal. A very prolific flowering type with fragrant blooms and a good strong grower. A favorite two-tone in most gardens.

BRIGHT, COLORFUL, EASY-TO-GROW FLORIBUNDAS

The distinctive charm and beauty of the floribunda is unsurpassed by any other class of rose. A cross between a hybrid tea and polyantha, they are very easy to grow, extremely hardy and create a superb display of color in beds, as hedges or specimen plants. The perfectly formed buds and pert blooms are generally borne in clusters and provide a full range of gay color continuously from June until frost. We offer only the most popular varieties for your gardening pleasure. All are healthy, two-year-old field grown plants. Shipped **SPRING** or **FALL**.

[A] 5150—RED PINOCCHIO

The most popular of the reds. Alluring brilliant red masses of 3½ inch semi-double blooms of velvety texture that **DO NOT FADE**. Long lasting blooms excellent for cutting and arrangements. Vigorous plants with healthy rich green foliage. Plant Pat. 812. NO. 1 **GRADE ONLY**. Each \$1.75; 3 for \$4.65 **POSTPAID**.

[B] 5153—IVORY FASHION

Perfectly formed buds slowly open to creamy white, extremely double blooms 3½-4 inches across. Clusters of 8-9 buds and blooms are not unusual. Medium height, sturdy plants. This 1959 All America selection should be in every rose garden. Plant Pat. 1688. Flowers retain their lovely shape and color for several days. NO. 1 **GRADE ONLY**. Each \$2.50; 3 for \$6.60. **POSTPAID**.

[C] 5158—CIRCUS

Low growing bushy type, perfect for borders or bedding. These low sturdy plants produce extremely large clusters of vari-colored fragrant blooms. The uniform golden buds open to many shades of yellow, buff, pink and orange-red tones. The first multi-colored floribundas to win All America honors. Strong stemmed clusters are ideal for cutting. NO. 1 **GRADE ONLY**. Each \$2.50; 3 for \$6.60 **POSTPAID**.

[D] 5151—FASHION

This lovely beauty carries the highest rating of all double floribundas. The petite perfectly formed buds open into exquisite coral-pink, blending into soft gold at the base of the petals. Vigorous, bushy 2-2½ ft. plants seem to never be without bloom. Very popular All America Winner. Plant Pat. No. 789. NO. 1 **GRADE ONLY**. Each \$2.00; 3 for \$5.25 **POSTPAID**.

[E] 5168—ROSENELFE

Sturdy 2½ ft. plants produce an amazing number of blooms in large clusters continuously. Rose-pink buds open to flowers of charming form, flushed pink on the inside and deep rose on the reverse. Extremely double, tight flowers so perfectly formed they seem almost artificial. Dark green, glossy foliage.

GRADE NO. 1½, Each \$1.15; 3 for \$2.95
GRADE NO. 1, Each \$1.39; 3 for \$3.89

[F] 5162—GOLD CUP

1958 ALL AMERICA winner. Large 3½ inch blooms of rich golden yellow. Low bushy plants with attractive leathery foliage. Very free blooming even through the hottest part of the summer. Excellent for beds or borders. This bright, gay, non-fading color makes a pleasant addition to your summer garden. **GRADE NO. 1 ONLY**. Each \$2.00; 3 for \$5.25 **POSTPAID**.

[G] 5169—GARNETTE

Enormous clusters of beautifully colored soft red, perfectly formed, camellia-like flowers. 14-16 buds and flowers on a single cluster are not unusual. Long lasting, fade-proof blooms are unsurpassed for cutting or arrangements. Low growing, vigorous plants seldom exceed 2½ ft. in height. **GRADE 1½ ONLY**. Each \$1.50; 3 for \$4.15 **POSTPAID**.

[H] 5155—FIRE KING

1960 ALL AMERICA selection. Brilliant fire-red extremely double flowers. Continuous heavy clusters of blooms all summer long. Long lasting brilliant color on the bush as well as in the vase. Plant Pat. No. 1758. **GRADE NO. 1 ONLY**. Each \$2.50; 3 for \$6.60

5287—FLORIBUNDA COLLECTION OF 4 FAVORITES

One each of Red Pinocchio, Ivory Fashion, Circus and Fashion. Heavy caned Grade No. 1 plants. **SAVE \$1.10**. All 4 only \$7.65 **POSTPAID**.

[I] 5176—EUTIN

By far the most popular rose for hedges, borders or bedding. Enormous clusters of double, rich red flowers with 60 or more in bloom at one time. Grows easily with little care. The picture on the opposite page was taken in the middle of August—a time when most roses are providing a minimum number of blooms. A universal favorite, Eutin is more in demand every year.

GRADE NO. 1½, Each \$1.15; 3 for \$3.25 **POSTPAID**
GRADE NO. 1, Each \$1.39; 3 for \$3.95 **POSTPAID**

EUTIN HEDGE—2 yr. 9-12 in. size. 10 for \$7.25; 25 for \$16.25. **Postpaid**.

[K] GRANDIFLORA ROSES

The newest of the rose classifications which literally means "large flowered." Actually the Grandiflora should combine the long stem and flowering characteristics of the hybrid tea plus the prolific blooming and cluster habits of the Floribunda. They are extremely hardy, strong, vigorous growers and have a definite place in every rose garden. We offer only No. 1 heavy caned stock in the most popular varieties. Shipped **SPRING** or **FALL**.

5029—QUEEN ELIZABETH. ALL AMERICA Selection 1955. A delightful, soft pink, delicately blending to a warm rich carmine-rose. Tall, robust plants with long graceful stems. Long lasting 4 inch flowers are excellent for cutting. Flowers have a distinctively different rose fragrance. **GRADE NO. 1 ONLY**. Each \$2.50; 3 for \$6.60 **POSTPAID**.

5035—CHERRY GLOW. A brand new rose that is bound to become a universal favorite. Large, cherry red 4"-5" blooms. Continuous clusters of buds and flowers all summer long. Tight, velvety blooms are perfectly formed. Attractive glossy foliage on strong growing upright bushes. **GRADE NO. 1 ONLY**. Each \$2.75; 3 for \$7.20 **POSTPAID**.

5044—STARFIRE. 1959 ALL AMERICA Rose selection. Perfectly shaped, large flowers, are dazzling, almost fluorescent, currant red. Long graceful stems on tall, sturdy upright bushes. Flowers occur both singly and in clusters. The sun-proof flowers last for several days. This outstanding new rose should be planted either as single specimen or in the background of your rose garden because of its tall growth habits. Plant Pat. No. 1742. **GRADE NO. 1 ONLY**. Each \$3.00; 3 for \$7.95 **POSTPAID**.

5025—GOLDEN GIRL. A delightful new aureolin yellow, blending to a deep golden yellow center. The high centered blooms are very double, and are borne both singly and in clusters. Their excellent lasting quality makes them ideal for cutting. Abundant, leathery foliage is disease resistant. Heavily branched upright bushes. A continuous abundant bloomer. **GRADE NO. 1 ONLY**. Each \$3.00; 3 for \$7.95 **POSTPAID**.

5220—COLLECTION OF 5 GRANDIFLORA ROSES

1 each Queen Elizabeth, Cherry Glow, Starfire, Golden Girl and Pink Parfait (see description back cover). All 5 of these outstanding new varieties, No. 1 grade heavy caned plants, for only \$12.95 **POSTPAID**.

[J] FLORIBUNDA ROSE HEDGE

Now at last a low-priced, quality rose hedge that will provide breathtaking beauty throughout the growing season. Extremely hardy, easy to grow on most any type soil. 2½-3 ft. high when fully mature. Plant 18-24 inches apart in full sun or partial shade. Your choice of colors from popular Floribunda varieties. Plants will bloom this year and will increase in beauty every year. Order generously for your border or hedge at these low prices. Available for spring planting only.

5519—RED
5526—PINK

5527—YELLOW
5528—WHITE

PRICES: 9-12 in. size plants. 5 for \$3.75; 10 for \$7.00; 25 for \$16.95; 100 for \$65.00 **POSTPAID**.

[L] BROWNELL Sub-Zero ROSES

only \$1.85 each This easy to grow, dependable strain is not only extremely hardy

for the cold regions of the north, but produces equally well in the heat of the south. They bloom abundantly. They are exceptionally vigorous, and their substance, color and size compare favorably with the largest and most popular of the well known hybrid tea varieties. They should be planted somewhat deeper than other roses and they will bloom the first year. Most of the Brownell varieties are especially resistant to **BLACK SPOT**. They are absolutely hard for any zone and are available for **SHIPPING BOTH SPRING AND FALL**.

5133—TIP TOES. An exquisite mixture of red, orange and pink tints of an unusual spicy fragrance. The lovely orange red buds open into many different colors as they unfold into full bloom. Sturdy, vigorous bushes. Plant Pat. No. 849.

5129—V for VICTORY. A beautiful very-double large flowered yellow of delightful fragrance. Perfectly formed slender buds open slowly and last exceptionally well even in hot dry weather. Plant Pat. No. 543.

5125—RED DUCHESS. A rich shade of rose red with a very pleasing fragrance. Absolutely resistant to black spot. High pointed blooms are perfectly formed. Plant Pat. No. 846.

5135—HANDSOM RED. A glowing velvety brilliant red of undescrivable beauty. Vigorous tall growing plants 4-5 ft. tall at maturity. Huge blooms up to 6 inches across. Very fragrant. Plant Pat. No. 1182.

5127—SHADES OF AUTUMN. A bi-colored large flowered beauty that combines brilliant scarlet with deep rose and rich yellow. Exquisitely formed blooms with gracefully curled petals. Deep glossy foliage. Flowers are borne abundantly on long graceful stems. Plant Pat. No. 542.

5136 CURLY PINK. A gorgeous two-toned pink bearing many large well formed blooms. Gracefully curled petals reminds one of the new 1961 All America selection Pink Parfait. Long graceful stems with dark glossy green foliage. Plant Pat. No. 842.

PRICES OF ABOVE VARIETIES: Each \$1.85; 3 for \$5.25 **POSTPAID**.

5277—COLLECTION OF 6 BROWNELL SUB-ZERO ROSES

1 each of V for Victory, Tip Toes, Handsom Red, Curly Pink, Red Duchess and Shades of Autumn. All 6 heavy caned, No. 1 grade bushes only \$9.95 **POSTPAID**.

BERRY'S NEW HYBRID LILIES

No other flower can match the majestic hybrid lily for incomparable charm and graceful beauty in your garden. So very easy to grow, and requiring little care these magnificent flowers are superb either in beds, backgrounds or as specimen plants. All of these hybrids are the famous Jan De Graff introductions, grown in America under controlled ideal conditions in order to supply our customers with the finest possible quality, disease free, top size bulbs. Every bulb is guaranteed to grow and guaranteed satisfactory quality.

JD1—HARLEQUIN HYBRIDS

A magnificent hardy strain of garden lilies in totally new colors, bred from the rare Korean Lilium cernuum. Very hardy, vigorous plants with unusual pleasing form. Introduced last year for the first time by Jan De Graff, world-famous lily hybridizer. Exciting new colors of pink, lilac, mauve, soft orange, salmon, yellow and ivory. Top size 6-7 inch bulbs. POSTPAID PRICES: Each \$2.49; 3 for \$5.98.

JD4—GOLDEN CLARION

A delightful new color with blooms 5-6 in. long opening to 6 inches across. These strong vigorous plants will grow as tall as 6 feet and often will bear 8 to 10 blooms in each cluster on the mature plants. The rich velvety lemon-yellow color is not found in any other lily. Large 6-7 inch bulbs. POSTPAID PRICES: Each 89c; 3 for \$2.39; 12 for \$7.98.

JD7—GREEN MAGIC

A sensational new color strain unlike any you have ever seen. Huge trumpet shaped blooms that will be a conversation piece for your lily garden. The magic of hybrid vigor seems to have given this strain added substance and a tolerance to adverse conditions. The enormous blooms when opened are a delightful chartreuse color. Large 6-7 inch bulbs. POSTPAID PRICES: Each \$1.00; 3 for \$2.69; 12 for \$8.49.

BERRY'S BLUE RIBBON IRIS

Selected dependable varieties. All are outstanding colors, large flowered and vigorous tall growers. All medal winners.

MA3816—MAYTIME. One of the very rare, two-tone pinks. The warm lilac-pink color is unmatched in any other variety. Large flowering, vigorous grower. POSTPAID PRICES: Each \$1.50; 3 for \$4.25.

MA3818—PALAMINO. An outstanding type with pale pink standards, with the outer petals pale ivory with copper-amber shoulder and trim around the ruffled edges. POSTPAID PRICES: Each \$1.95; 3 for \$5.65.

MA3822—BLACK FOREST. Gleaming silk, blue-black. Medium sized, fragrant flowers. POSTPAID PRICES: Each \$1.25; 3 for \$3.55.

MA3824—REDWYNE. The best of the reds. Rich, bright red falls one large sized blooms. An outstanding color that should be in every garden. POSTPAID PRICES: Each 95c; 3 for \$2.60.

MA3828—SOLID GOLD. Deep golden color with just a cast of orange. Huge broad flowers. The finest of the golds. POSTPAID PRICES: Each \$1.45; 3 for \$4.10.

MA3815—Berry's Iris Garden

One each of Palamino, Black Forest, Redwyne and Solid Gold.

All 4 only \$5.35 POSTPAID.

JD2—FIESTA HYBRIDS

A new strain of exceptionally hardy lilies with gracefully reflexed flowers that come in colors of red, orange and yellow with some browns, maroons and amber shades mixed in. Flowers sprinkled with small maroon-black dots. They produce many bulblets underground that will flower the following year to make large clumps of flowering stems. Large 5-6 inch bulbs. POSTPAID PRICES: Each 69c; 3 for \$1.69; 12 for \$5.98.

JD5—EMERALD STRAIN

A most amazing white hybrid lily that we have seen. The slender graceful buds open into a beautiful emerald green, changing to a pure cool white when fully opened. The vigorous tall growing stems that bear large clusters of buds and blooms. Best when planted in partial afternoon shade. Large 6-7 inch bulbs. POSTPAID PRICES: Each \$1.00; 3 for \$2.69; 12 for \$8.49.

JD8—ROYAL GOLD

A true golden yellow beauty that will be a proud addition to any garden. Very easy to grow, extremely hardy and healthy. The picture on the opposite page shows a characteristic cluster of the enormous blooms and buds that you can expect from this outstanding new strain. Blooms just a little later than the Regale parent. Stems grow 4 to 5 ft. tall. Large 6-7 in. bulbs. POSTPAID PRICES: Each 89c; 3 for \$2.39; 12 for \$7.98.

MAGNIFICENT NEW VARIETIES-All Postpaid

JD3—MID-CENTURY HYBRIDS

A race of hardy, showy and vigorous plants with flowers that either face upwards or face outwards and look straight at you. Fascinating color-range from light yellow through all shades of orange and deep maroon. These brilliant hybrids multiply rapidly and last for years. Ideal for cut flowers and arrangements. Easy to grow and they bloom early. Large size 5-7 inch bulbs. POSTPAID PRICES: Each 49c; 3 for \$1.29; 12 for \$4.29.

JD6—PINK PERFECTION

Similar in habit and culture to Jan De Graff's Great Olympic Hybrids. The enormous blooms are a deep fuchsia-pink to purple coloring when fully opened. Hardier than the well-known regal lily, taller and more vigorous, they need only a well drained porous soil to give a fine performance. One of the very newest for your lily garden. Large 6-7 inch bulbs. POSTPAID PRICES: Each \$1.29; 3 for \$3.69; 12 for \$10.98.

JD9—BLACK MAGIC

The finest white trumpet lily ever produced. When fully opened measure 6 to 8 inches across. Outside of the flowers are deep, almost black maroon, opening into a dazzling pure white on the inside. Uniform in size and well placed strong stems. Many dealers are asking as much as \$2.75 each for this outstanding new introduction. Large 6-7 inch bulbs. POSTPAID PRICES: Each \$1.29; 3 for \$3.69; 12 for \$10.98.

FAVORITE AMERICAN GROWN LILIES

JD11—AURATUM PLATYPHYLLUM. An improved strain that is hardier, more resistant to disease and more beautiful than the original Auratum species. Often called the Gold Band Lily. These lovely lilies prefer rich, well-drained soil and long, cool growing season. They normally flower in August and September. Enormous, huge, trumpet-like flowers that are a waxy-white color, generously dotted with small red spots. In the center of each petal is a rich golden stripe. Mature plants have 12 to 18 flowers on a single stem. American grown, disease free large 6-7 inch bulbs. POSTPAID PRICES: Each 79c; 3 for \$2.19; 12 for \$6.98.

JD12—RED CHAMPION. A much improved strain of the Speciosum Rubrum, also known as the red showy Lily of Japan. Very easy to grow in any well-drained soil where it should receive light shade during the hottest part of the day. That's all it needs. Tremendous sized flowers of warm pink, slightly ruffled at the petal tips. A very popular, hardy variety. Valuable for garden decoration or cut flowers. Large 6-7 inch size bulbs, American grown. POSTPAID PRICES: Each 69c; 3 for \$1.69; 12 for \$4.98.

JD14—HENRYI. An old-fashioned favorite that everyone loves. Handsome, tall growing plants 5-7 feet high bearing wide-spreading, graceful sprays of brilliant apricot-orange flowers. The large 5-6 inch blooms generally come on in early August. Very easy to grow, thriving in open ground with minimum care. American grown, disease free bulbs, large size 6-7 inches around. POSTPAID PRICES: Each 59c; 3 for \$1.49; 12 for \$4.79.

JD16—REGALE. Truly America's most popular lily with a delightful, pungent scent that permeates your entire garden. Each 3-4 foot stem produces large clusters of waxy-white blooms which come on in June and early July. The buds and outside of the petals are deep maroon. Very easy to grow in full sun or partial shade. American grown, disease free, large size bulbs 6-7 inches around. POSTPAID PRICES: Each 39c; 3 for 98c; 12 for \$3.29.

M

PLEASE EXCUSE THE MISTAKE BUT SOMEONE GOOFED

On Page 9 of this catalog the prices and descriptions were omitted of Berry's Garden Chrysanthemums. These mums are pictured on the lower right corner of page 8. Here are those prices and descriptions.

MA2100—CHIPPA RED. Beautiful velvety red, blending into a rich smoky maroon as the blooms mature. Vigorous 20"–24" plants are covered with 3"–4" blooms continuously from late summer until frost.

MA2101—PRAIRIE SUNSHINE. Magnificent 4"–4½" completely double flowers with slightly incurved petals. Brilliant yellow-gold color lasts until the petals drop. 24"–30" plants alive with dazzling color from September until frost.

MA2102—EVELYN DELANEY. Delightful rose pink with slightly deeper color on the reverse side of the petals and in the center. Fully double, with irregular shaped petals. Flowers 3"–4" across in abundance in late summer.

MA2103—WHITE SAIL. A new crisp, clean white variety with extra large full blooms. Buds have a slight pink tone. Perfectly shaped blooms cover the bushy 24" plants. Flowering from mid-season until frost.

MA2104—FOOTBALL BRONZE. A glorious blend of brilliant autumn colors with rich copper bronze, blending to warm orange-yellow at the petal tips. Large "greenhouse" type blooms are 4"–4½" across. A real beauty.

GL17—COPPER LUSTRE. (Not pictured) Smoky rose copper edges shading to a dark tan with red blotch in throat. Heavily ruffled, 7-8 blooms open at one time.

GL18—LORELEI. (Not pictured) Beautiful ivory-cream with distinct golden throat. Slightly ruffled florets. Opens 8-9.

WINNING GLADS

[H] BLOOMIN' BARGAIN GLADS

Our special rainbow mixture containing all popular varieties in plain colors, bi-colors, ruffled and blotched. A grand array of color at less than half the cost if you purchased by individual varieties. We guarantee every bulb to bloom if planting recommendations are followed. 30% or more red and pink colors. Available in two different bulb sizes.

GLB—100 (1¼-1½ in. diameter). 30 bulbs \$1.29.

GLB—101 (1-1¼ in. diameter). 30 bulbs only 98c.

[I] GL40—BIRD OF PARADISE

An exotic novelty that is unlike any other glad. Orchid-like blooms have ruffled, fluted needle-point petals. Florets are 6-7 inches across, with 3-4 open at one time. Colors blend from creamy pink to very pale apricot with light pink edges and deep coral splash in the throat. Excellent for arrangements. POSTPAID PRICES: Each 40c; 3 for \$1.00; 12 for \$2.98.

[J] HARDY AMARYLLIS

(*Lycoris squamigera*.) Beautiful orchid-pink blooms with 8-12 on a single stalk. Blooms for years if left undisturbed. Lush green foliage in the spring dies down in early summer then the straight tall flower stalks appear as if by magic in August. Blooms last for about 2-3 weeks. Hardy but may need some winter protection in the extreme north areas. Large size bulbs shipped both SPRING AND FALL. POSTPAID PRICES: Ea. 39c; 3 for \$1.69.

BERRY'S PRIZE-WINNER, BLUE RIBBON GLADS

Highly rated varieties all producing giant, exhibition size blooms. All have been grand champion winners at national shows. Large, clean bulbs guaranteed to please you in every way. All are postpaid.

[B] GL44—MONOGRAM

Soft pink blending to rich cream colored throat. Wide flaring, fluted blooms, well-placed on sturdy spikes. The finest pink glad we have seen, opening 8-9 flowers at a time. Ea. 25c; 3 for 69c; 12 for \$2.39.

[C] GL42—RUFFLED LACE

Lustrous rich pink, heavily ruffled, with bright red blotch. Extra large flowers open 7-9 at a time that last well for cutting. Ea. 25c; 3 for 69c; 12 for \$2.39.

[D] GL41—GREEN ICE

The most sensational glad developed in many years. Cool lime green color shades darker toward the center. Strong healthy grower reaching

5 ft. or more. Opens 8-10 at once. Don't miss this one. Ea. 35c; 3 for 89c; 12 for \$2.98.

[E] GL43—MAHOGANY

Without a doubt the finest of the "blacks." Large 5 inch, ruffled dark mahogany blooms with black streaks toward the edges of the petals. 15-20 buds and blooms on a single tall spike! Unbelievable size and color. Ea. 75c; 3 for \$1.98; 12 for \$6.95.

[F] GL45—ARES

Novel butterfly shaped blooms. A consistent winner opening 8 or more enormous blooms at a time. Ruffled waxy, white and pink with large brilliant red blotches. Vigorous tall stems. Ea. 35c; 3 for 89c; 12 for \$2.98.

GLB300—BERRY'S BLUE RIBBON COLLECTION

3 of each above varieties—all 15 bulbs
Only \$4.39 POSTPAID

[G] BERRY'S EXHIBITION GLADS

These varieties are all listed in the official glad-iola classifications as giant size with florets 5½ inches or more across. We have selected these also for their rare beauty and exceptional plant vigor. All are large size 1½ inch diameter bulbs. Planting recommendations and cultural instructions are included with every order.

GL34—ROSITA. Distinctive shade of rose with small dark blotch, edged white around the petals. Strong grower with huge spikes.

GL31—A. B. COUTTS. Beautiful peach-apricot buff that is far superior to any other in this color range. Enormous blooms that open 6-8 at one time.

GL32—ACE OF SPADES. One of the blackest reds—well named. 5½ inch florets opening 5-6 at a time. Slightly ruffled.

GL33—KING SIZE. Gigantic best describes this one. Light salmon with carmine lines on a cream

throat. Strong grower that often opens 10 on a 3 ft. head.

GL35—SHEREREZADE. Rich velvety pink with bright strawberry blotch. Opens 6-8 large, uniform florets—tall spikes.

GL36—HARRISBURGER. Considered by many as the best all purpose glad. Blooms later than most. No other shade of red compares with the deep cherry color with enormous individual florets. Fine for cutting.

POSTPAID PRICES: 5 of 1 variety 69c; 10 of 1 variety \$1.19; 25 of 1 variety \$2.49.

MA2378—2 for \$1.20; 6 for \$3.35 POSTPAID.

[L] ALYSSUM SAXATILE.

An excellent spring-blooming perennial with large masses of tiny, brilliant yellow flowers. Very effective in walls and rock-gardens. Any well-drained ordinary soil will do. Plant in groups of 3 or more, 6-8 inches apart, in **SPRING or FALL**. Very hardy.

MA2303—2 for 98c; 6 for \$2.50 POSTPAID.

[M] HARDY ENGLISH ASTER.

(Michaelmas Daisies) Planted in broad masses, these cheerful gay, fall-blooming asters create a colorful landscape. Bushy, compact plants completely covered with flowers when in full bloom. Very hardy, easy to grow in most soil types. Plant **SPRING or FALL**.

MA2187—WINSTON CHURCHILL. Red.

MA2186—JANET McMILLEN. Rose-pink.

MA2184—EVENTIDE. Deep lilac-blue.

Your choice of colors: Ea. 85c; 3 for \$2.25 POSTPAID.

[N] DWARF HARDY ASTER.

These compact, busy plants are covered with colorful blooms from late summer until frost. Ideal for borders or rock garden, they grow from 12-15 inches high. Very hardy.

MA2182—LITTLE RED BOY. Deep rose.

MA2189—PERSIAN ROSE. Bright pink.

MA2190—WHITE FAIRY. Pure white.

Ea. 85c; 3 for \$2.25 POSTPAID.
2 for \$1.39 POSTPAID.

MA2630—PACHYSANDRA.

(Not pictured). A fast growing, quick spreading ground cover, staying green the year round. Attractive glossy, thick foliage. GROWS UNDER ALL EVERGREENS. Hardy everywhere. Plant about 6" apart.

POSTPAID PRICES: 25 for \$5.50; 50 for \$10.00; 100 for \$18.50.

Page 13

FARM SEED

NEW, HEAVY YIELDING SUPER FLAMANDE ALFALFA

A superb, new short rotation variety of exceptional yielding ability. It is winter hardy, and recovers unbelievably fast after cutting. Super Flamande grows faster, matures earlier and has a longer growing period than any other Alfalfa we have tested. In most areas it is possible to take the first cutting early in June—this not only means top quality hay but increased yields. In many cases, it is possible to harvest one cutting of Alfalfa the first fall. Consider these advantages Super Flamande gives you: increased seedling vigor, quicker recovery, winter hardiness and longer growing period. We consider it superior to other Alfalfas in this class such as Narragansett, Atlantic and DuPuits. If you are the farmer that likes to try the new improved Alfalfas first, then be sure to include Super Flamande in your seeding program this spring. Compare it with the varieties that you are now raising and see for yourself the vast difference. **Postpaid Prices:** 5 pounds **\$3.50**; 10 pounds **\$6.50**. For prices per bushel and hundred weight, see the enclosed price sheet.

BERRY'S ALFALFA BLENDS

5-YEAR BLEND ITEM NO. 5

We have carefully selected outstanding lots of Vernal and Ranger and blended them into one special lot to give you the best, in one package, of the two most widely recommended varieties of Alfalfa used in the Corn-belt area today. Sow about 10-12 lbs. per acre. In our five year blend you get winter hardy, disease resistant, high yielding seed, at a price just slightly above our other World Brand grades. There is no finer quality than our Five Year Blend. Our normal tests run 99.50% or better pure with germination as high as 94%. We believe this blend of Alfalfa will last longer than any other seed on the market today. Don't take a chance with non-hardy, disease susceptible, varieties such as DuPuits, Common and others when for practically the same price you can have the best. Our five year blend is your best assurance of consistently good yields particularly if you want to keep a stand for more than two years. Our exclusive Gro-Coated protection makes it even better. Small quantities 5 lbs. **\$3.50**; 10 lbs. **\$6.00 Postpaid**. For larger quantities see Item No. 5 on our price list.

2-YEAR BLEND ITEM NO. 2

When you want a short rotation of Alfalfa, one that is good for two years, then choose our 2 year blend. It has rapid seedling vigor so that it attains a good growth the very first year. We recommend sowing a little heavier than our hardier types and you should seed about 15-20 lbs. per acre. This is made up of the Texas, New Mexico and Arizona origins—noted for quick first year growth. Often times it is possible to use this blend for hay or pasture the first year. Many of our customers plow it under when it reaches a good height. Use a light cover crop of spring grain for best results.

Postpaid Prices: 5 lbs. **\$2.75**; 10 lbs. **\$5.00**; for larger quantity prices see Item No. 2 of our price list.

WILT-RESISTANT ALFALFA VERNAL

Vernal is the most widely recommended variety of Alfalfa where winter hardiness is an important factor. It has shown a higher resistance to bacterial wilt than Ranger, which is an important consideration in buying Alfalfa seed. Vernal has been distinctly superior to all varieties tested in Wisconsin, Iowa and other similar areas. It shows better persistence under earlier and more frequent cuttings and has been more outstanding in grazing tests than other winter hardy varieties. There is one thing to be remembered in buying Alfalfa—choose a variety that can be plowed under when you want to plow it down—not when you have to. Our recommendation is Vernal for the following areas: Iowa, Wisconsin, Michigan, Northern Illinois, Indiana and Ohio. We offer both the Certified and World Brand Grades.

CERTIFIED VERNAL ITEM NO. 29

Certified seed is always your best buy. It is sown, grown, harvested and cleaned under state supervision. Highest purity and germination. We always recommend Certified seed when it is available in quantities at no great premium in price. Regardless of which grade you buy you can be assured of the best when it's Gro-Coated Brand. See Item No. 29 for prices.

VERNAL WORLD BRAND ITEM NO. 23

Our World Brand Vernal retains the same superior characteristics as our Certified grade. We select only the finest lots of Vernal for our World Brand quality. Mature bright plump seed, carefully selected and blended, will qualify for Berry's World Brand. It's Gro-Coated to give you even more for your money. Small quantities 5 lbs. **\$3.25**; 10 lbs. **\$6.25 Postpaid**. For larger quantities see Item No. 23 on our price list.

HARDY ADAPTED ALFALFA

RANGER

Item No. 25—Western Grown
Item No. 26—Northern Grown

CERTIFIED ITEMS NO. 25 and 26

Ranger is highly recommended in practically every state where winter-hardiness and resistance to bacterial wilt are a factor. Certified seed is always your best buy. The ability of Ranger to persist for several years under adverse weather conditions insures you of hay and pasture every year at very little or no premium in seed costs. Because of this high persistence, you plow Ranger under when you want to rather than when you have to as is often the case with less hardy varieties such as Du Piuts and other common types. See Item No. 25 and 26 on Price List.

WORLD BRAND RANGER ITEM NO. 27

There is very little actual difference in quality between our World Brand and Certified grades. The desirable characteristics that make Ranger so much superior are retained in our World Brand quality. Our buyers are very careful in selecting lots from dependable growers to be sure we get only top grade pure seed. Minimum specifications for our World Brand Ranger are 99.25% purity and 90% germination.

POSTPAID PRICES: 5 lbs. \$3.00; 10 lbs. \$5.50. See Item No. 27 for Quantity Prices.

OTHER HARDY ALFALFAS

WORLD BRAND GRIMM TYPE

ITEM NO. 19

Grimm is still the favorite of many of our customers. It is hardy for any area and top quality seed — Gro-Coated to insure better, more vigorous stands. We recommend Grimm for short rotations, two or three years. Where longer rotations are needed, use either Vernal or Ranger. See Item No. 19 on the Price List.

WORLD BRAND COSSACK

ITEM NO. 20

Cossack is another winter-hardy variety that has performed well in northern areas on a 2 or 3 year rotation program. World Brand Cossack is preferred by a large number of our customers, particularly in Iowa and Nebraska. Here again, we recommend using Ranger or Vernal for longer rotations. See Item No. 20 on Price List.

WORLD BRAND NORTHERN

ITEM NO. 18

This is the same type alfalfa that was formerly sold as Dakota #12. It seems to be heavier stemmed than Cossack and Grimm and generally recovers faster after cutting. It has yielded exceptionally well during the second year of production. The wilt-resistant varieties should be used in long rotations. Available only in our unexcelled World Brand quality. See Item No. 18 on Price List.

CUT YOUR SEEDING COSTS

HONEST JOHN

Item No. 11

Hundreds of our customers who have bought Honest John for many years will sow nothing else. They like the economy and the performance of Honest John. They know they are buying dependable seed at a big savings—it generally sells for about one-third less than our best grades.

A BLEND OF HARDY ALFALFAS

We carefully blend several different types of alfalfa in Honest John. These include grimm, common, cossack and ranger. There are no non-hardy origins used. Since a larger percentage of smaller, thinner berries go into Honest John, you actually get many more seeds per pound so that you need not sow it any heavier than you would if you were using the better grades. We recommend sowing about 10 to 12 pounds per acre. The added protection of Gro-Coated Brand treatment makes Honest John a remarkable value in hardy alfalfa. Refer to Item No. 11 on the price list. **Small Quantities Postpaid. 2 lbs. \$1.40; 5 lbs. \$3.30; 10 lbs. \$4.80.**

LOT BEAUTY RED CLOVER & ALFALFA MIXTURE

Many farmers make a practice of mixing legume seedlings. It is possible to obtain better stands and heavier yields in many cases by sowing mixtures of this type. Our Lot Beauty contains about 75% Red Clover and 25% hardy Alfalfa—an ideal combination for both hay and pasture. The Red Clover is all central states origin—hardy and well adapted for all mid-western states. If you buy alfalfa and red clover to mix in these proportions you will pay at least 15% more.

SEEDING RECOMMENDATIONS

We have found that Lot Beauty seeded at 8 to 9 lbs. per acre is sufficient to assure good healthy stands. This is possible because of the Gro-Coat protection which we use on all legume seeds. This blend is high quality seed, free of noxious weeds, and seldom contains more than a mere trace of other crop seed such as alsike or sweet clover. 5 lbs. \$3.00; 10 lbs. \$5.50 POSTPAID. See Item No. 31 on Our Price List for Larger Lots.

BUFFALO

WILT RESISTANT

CERTIFIED—ITEM NO. 21

Buffalo is an improved selection from Kansas Common that possesses the same marked resistance against bacterial wilt as Ranger. Buffalo may not survive the severe winters of the northern states as well as Ranger and Vernal but it is superior in many cases in the production of forage and in its ability to recover faster after cutting. We recommend Buffalo for Kansas, Missouri, southern Iowa, southern half of Illinois and Indiana. There is no finer grade than our Certified seed made even better by our exclusive Gro-Coat protection. Item No. 21 on Price List.

WORLD BRAND—ITEM NO. 22

The same high standards of quality are maintained in our World Brand Buffalo as in our Ranger described above. It possesses the same characteristics as our Certified grade and in appearance, there is no apparent difference, yet it is priced at a good savings below the Certified. 5 lbs. \$3.00; 10 lbs. \$5.50 POSTPAID. See Item No. 27 on Price List for Larger Quantities.

RED CLOVER

KENLAND

MEDIUM
RED CLOVER

CERTIFIED—ITEM NO. 37

Kenland is a superior variety of Medium Red Clover adapted to Ohio, Indiana, Illinois, Iowa and all areas south of these states. It has shown good resistance to Southern anthracnose and has consistently outyielded common types by as much as 30% where this disease is a factor. Certified Kenland assures you of the very best in Red Clover seed at very little premium in seed cost. It is not recommended for Wisconsin, Minnesota and Michigan but in its adapted area is definitely superior to our common types of Medium Red Clover. Sow in the spring 8-9 lbs. per acre. Small Quantities: 2 lbs. \$1.75; 5 lbs. \$4.00. See price list Item No. 37 for larger quantities.

WORLD BRAND—ITEM NO. 38

The same general description applies to our World Brand as the Certified grade. We are extremely careful in selecting only lots of Kenland produced by dependable growers from genuine Kenland fields. 99.25% pure and 90% germination are our minimum specifications for World Brand quality. 5 lbs. \$2.50; 10 lbs. \$4.25 POSTPAID. For larger quantities see Item No. 38 on price list.

Be Sure to Inoculate. 1 Bu. Size 60c; 2½ Bu. Size \$1.20 POSTPAID.

For HAY PASTURE SOIL IMPROVEMENT

CENTRAL STATES

MEDIUM RED CLOVER

WORLD BRAND—ITEM NO. 34

Our Central States Red Clover is well adapted for the entire Cornbelt area. It is top quality in every respect and priced to cut your seeding costs to a minimum. Red Clover is the foundation for crop rotation throughout the middlewest because it is valuable as hay, pasture, soil improvement and for cash seed crops. Our World Brand Red Clover will be a minimum of 99% pure and 90% germination. Sow only 7-8 lbs. per acre with our Gro-Coated Red Clover. Price small quantities. 5 lbs. \$4.00; 10 lbs. \$7.00 POSTPAID. For other prices see Item No. 34.

SPECIAL BRAND RED CLOVER—ITEM NO. 32

Our lowest price Medium Red Clover. Not so fancy in appearance but a good serviceable lot of seed priced below our World Brand grades. Generally runs about 12-15% below our best grade in germination but because of the smaller size seed you can sow at the same rate of 7-8 lbs. per acre. 5 lbs. \$3.75; 10 lbs. \$5.75 POSTPAID. Larger quantities quoted on price list Item No. 32.

IDAHO WORLD BRAND

ITEM NO. 35—Idaho seed is always more brilliantly colored and the berries are perhaps slightly larger which assures you of excellent quality. Many believe it to be more hardy than the Central States origin. We recommend sowing Idaho seed 8-9 lbs. per acre. 5 lbs. \$4.00; 10 lbs. \$7.00 POSTPAID. For other prices see Item No. 35.

DOLLARD

MEDIUM
RED CLOVER

CERTIFIED—ITEM NO. 39

A new hardy variety that has shown resistance to Northern Anthracnose. It has been definitely superior in yields in Wisconsin, Minnesota and Michigan where this disease is common. Dollard has persisted into the third year year more than common varieties. It blooms slightly later than other types but seems to produce a better second cutting. We offer only the Certified grade—always your best buy. Tests have shown 15% increase in yields as compared to Common Medium Red Clover in its adapted area. Sow 8-9 lbs. per acre. See Item No. 39 on our price list.

LOT JOE

MEDIUM
RED CLOVER

ITEM NO. 33—Here is a real value. Contains from 2-3% of other crop which is Alfalfa, Alsike and some Sweet Clover, Lot Joe has a good germination, 85% or better, and is nice bright clean seed from from noxious weeds. We buy this seed at a discount over our World Brand which enables us to offer this outstanding value. Sow 8-9 lbs. per acre. Gro-Coated for your assurance of better stands. 5 lbs. \$3.25; 10 lbs. \$6.00 POSTPAID. See Item No. 33 on price list for larger quantities.

MAMMOTH Red Clover

WORLD BRAND—ITEM NO. 41

Mammoth Red Clover grows taller and heavier than the Medium types. It is sometimes referred to as one cut or sapling clover. Mammoth blooms later than other Red Clovers and while only one hay crop can be harvested yields are generally comparable to the two crop types. It is excellent for soil improvement and few legumes will build up the soil as fast as plowing under a heavy growth of Mammoth Clover. It is superior to Medium pastures because it lives longer and is probably more drought resistant. Sow about 8-9 lbs. per acre. Small quantities. 5 lbs. \$2.25; 10 lbs. \$4.00 POSTPAID. For other mammoth prices see Item No. 4.

Lot SOILBUILDER

MAMMOTH & SWEET CLOVER MIXED

ITEM NO. 43—A wonderful blend for building up soil fertility. Contains about 65% Mammoth and 35% Sweet Clover. A mixture of this type will really produce a heavy growth with the Sweet Clover growing tall and the Mammoth filling in the lower growth. Plowing under a heavy stand of Soilbuilder will do wonders for your land. Sow 12 lbs. per acre, and inoculate with Berry special live inoculation. Soilbuilder is all top grade seed both in purity and germination. For Soilbuilder prices see Item No. 43.

BIRDSFOOT TREFOIL

CERTIFIED EMPIRE

ITEM NO. 66—Empire Trefoil has consistently proven superior to imported types. Trefoil has the ability to establish itself under unfavorable soil conditions and seems to produce well in many soil types where Alfalfa and other legumes fail to grow. The feeding value of Trefoil is very high and in many tests was found to be far superior to Alfalfa and other legume-grass combinations in beef production.

Trefoil should be seeded in the spring on a well prepared, firm seed bed. Never cover over ¼-½ inch deep. We recommend sowing 5-8 lbs. per acre depending on the purpose for which it is to be used. Small quantities 1 lb. \$1.25; 5 lbs. \$5.50; 10 lbs. \$10.00 POSTPAID. Other quotations on price list Item No. 66.

BE SURE TO INOCULATE HEAVILY

LADINO CLOVER

CERTIFIED—ITEM NO. 63

Ladino is similar in appearance to the common white pasture clover but grows from two to four times as large. It is easy to grow, widely adapted and very productive. We recommend using with grasses such as Orchard, Bromo or Fescues sowing about ½ lb. Ladino per acre in such combinations. The seed is very small which accounts for the low seeding rate. Ladino, in addition to having a tremendous carrying capacity for livestock, also provides an excellent green pasture for poultry. Be sure to sow plenty of grasses with Ladino to reduce the danger of bloating when pastured. 1 lb. \$1.10; 5 lbs. \$5.00; 10 lbs. \$9.00 POSTPAID. For larger quantities see Item No. 63.

GRASSES

Most farmers are well aware that productive pasture land is essential in order to profitably produce livestock. They know, too, that grasses are a necessary part of good conservation practices and profitable farm management. Good pastures provide the most economical type of feed for all livestock. Properly managed grassland farming will result in low cost agricultural production. There are grasses available for every farm need and at Berry's the selection is large and varied with prices always right.

BROME GRASS

LINCOLN BROME—ITEM NO. 139

Lincoln Brome is widely adapted and under proper management will produce profitable seed crops. It is tall and leafy and makes ideal pasture when used alone, with legumes or other grasses. This past summer was not a good year for seed production and prices are considerably higher than a year ago. Our cleaning and processing facilities enable us to offer quality Lincoln Brome at real savings.

5 lbs. \$3.00; 10 lbs. \$5.50 POSTPAID. See Item No. 128 on Price List.

CERTIFIED LANCASTER BROME

ITEM NO. 137

A superior selection of hardy brome that has outyielded all other varieties tested in Nebraska in both forage and seed production. It is a leafy, fine-stemmed strain, extremely hardy. Lancaster is well worth the difference in price.

TALL FESCUES

Tall Fescue is primarily a pasture and soil conserving grass. It is a deep-rooted, long-lived variety with dark shiny leaves. The maximum height of a mature plant is about three feet. It is widely adapted and seems to flourish in poorly drained areas as well as those with small amounts of moisture. There are two types of tall fescue, both very similar in appearance; Alta and Kentucky 31. Seed can be sown in spring or fall. When seeded alone, use 10-12 lbs. per acre. Use about 5 lbs. per acre in combination with other grasses and legumes. Combinations of Ladino, Fescue, and Alfalfa are commonly used with good results.

KENTUCKY 31 FESCUE—ITEM NO. 147

Many of our customers prefer the Kentucky 31 strain because they feel it is more hardy than Alta. Kentucky 31 originated on a farm in Kentucky where it had grown for many years from the original plants.

5 lbs. \$2.50; 10 lbs. \$4.50 POSTPAID. See Item No. 147.

ALTA FESCUE—ITEM NO. 149

Most of the Alta Fescue is produced in Oregon where it originated. Alta is probably grown more extensively than Kentucky 31 although most experts agree there is little if any significant difference between the two strains.

5 lbs. \$2.50; 10 lbs. \$4.50 POSTPAID. See Item No. 149.

TIMOTHY

Timothy was first propagated in this country as early as 1747. It is perhaps the easiest grass to raise yet one of the most popular and important.

Timothy is widely adapted and is grown for both hay and pasture. One of the most widely used seedings for hay is that of Red Clover and Timothy. We recommend seeding about 4-5 lbs. of Timothy with 7-8 lbs. of Red Clover per acre. Timothy may be seeded both spring and fall. It is still the most economical grass to sow.

NEW CLIMAX TIMOTHY

This is one of the newest strains of Timothy developed in Canada. It is extremely hardy and seems to produce more leaves than the common strains. It yields well in both forage and seed, and recovers well after cutting. SMALL QUANTITIES POSTPAID. 2 lbs. \$1.20; 5 lbs. \$2.75; 10 lbs. \$5.00. See Item No. 76 for larger quantities.

WORLD BRAND TIMOTHY—ITEM NO. 79

Our finest quality of common Timothy. Beautiful bright seed which generally runs at least 99.50% pure. Gro-Coated to insure better stands.

DEALERS FANCY GRADE—ITEM NO. 78

A very serviceable clean grade of seed but may contain a small percentage of Alsike. Does not run quite as high in germination as the World Brand.

ORCHARD GRASS

ITEM NO. 142—Orchard Grass starts growing very early in the spring and develops rapidly, maturing for hay or seed earlier than Brome or Timothy. It recovers rapidly after grazing or mowing and produces an abundance of forage throughout the growing season. More and more farmers are sowing Orchard Grass every year as they realize the value, both as a meadow and hay crop. It will grow during the drier, warmer part of the summer, making it more desirable in this respect than Timothy and Brome Grass. It is widely adapted, being grown in practically every state and in some areas in Southern Canada.

SEEDING RECOMMENDATIONS

Early spring seems to be the best time for sowing Orchard Grass. Late summer or early fall seedings are satisfactory for states of Missouri, Southern Illinois, Indiana, and similar areas. North of these areas, spring seeding is recommended. When seeded alone, use 10-12 lbs. per acre. With Ladino, use 6-8 lbs. with 1 lb. Ladino. With other grasses, use 5-6 lbs. Orchard Grass.

5 lbs. \$3.00; 10 lbs. \$5.50 POSTPAID. See Item No. 142 on Price List.

NEW S-37 ORCHARD GRASS

ITEM NO. 141—A new variety available this year in quantity for the first time. Leafier growth and very palatable. Small quantities postpaid.

5 lbs. \$3.50; 10 lbs. \$6.50. See Item No. 141 for larger quantities.

REEDS CANARY GRASS

ITEM NO. 141. The habitat of Reed Canary Grass is poorly drained, wet areas but it is also one of the most drought-tolerant grasses on well-drained upland areas. Well established stands will supply abundant pasture and it is readily eaten by most livestock, particularly beef cattle. It starts growing very early in the spring and if not pastured heavily, will grow to a height of 4-5 feet at maturity. Reed Canary Grass is slow to get started from seed and the recommended procedure is to sow a small area, about 1/2 acre, as a nursery, using about 12 lbs. per acre. When this small area is started good, cut sod pieces to be used in gully, ditch bottoms, and other hard to seed areas. It develops faster in this manner. Write for our free circular.

PRICES: 1 lb. \$1.00; 5 lbs. \$4.50; 10 lbs. \$8.50 POSTPAID. See Item No. 141 on Price List.

RED TOP

A widely adapted grass that will grow on soils so poor in fertility that other grasses fail. It is particularly adapted to wet low areas and is valuable for seeding waterways, drainage ditches, and eroded areas. We recommend using with other grasses and legumes on low wet land. Red Top is also a suitable lawn grass when used with Blue Grass and other adapted grasses. In pasture mixtures, sow 3-5 lbs. If seeded alone, 8-10 lbs. per acre.

PRICES: 1 lb. \$1.00; 5 lbs. \$4.50; 10 lbs. \$8.00 POSTPAID. See Item No. 127 on Price List.

PERENNIAL RYE GRASS

ITEM NO. 129 — A fast growing short-lived perennial. Used widely for cover crops and in pasture mixtures. It grows faster than Brome and Timothy but after the second year, begins to thin out rapidly. Plants grow about 2 feet tall at maturity. Sow 20 lbs. per acre alone or 8 to 10 lbs. with other grasses. PRICES: 3 lbs. \$1.50; 5 lbs. \$2.40; 10 lbs. \$4.50 POSTPAID. See Item No. 129 on Price List.

DOMESTIC RYE GRASS

ITEM NO. 128—This annual type rye grass is rapidly increasing in importance as a forage and soil improvement crop. It is primarily used as a fast growing temporary pasture but is also widely used in lawn mixture as a nurse crop. It is very economical and can be used generously on any area where a quick cover is needed. We recommend spring sowing in northern areas and fall or spring in the south. PRICES: 3 lbs. \$1.40; 5 lbs. \$1.90; 10 lbs. \$3.60 POSTPAID. See Item No. 128 on Price List.

Sweet CLOVERS

Sweet Clover thrives under a wide range of soil and climatic conditions. It will not grow well on acid soils but seems to thrive on most all the other soil types. It has large deeply penetrating roots which are valuable in storing nitrogen and for "loosening up" hard compact soils. Sweet Clover has no equal as a soil improving crop. Most Sweet Clover strains are biennial or two year crops and the second year growth is normally plowed down as a green manure crop in the spring. The most common strains of Sweet Clover are the Yellow Blossom, which is somewhat finer stemmed and the White Blossom, or tall type, which is later and grows somewhat taller than the yellow. Both types are grown widely in the corn-belt region. Seeding rates vary from 12-15 lbs. per acre. **Inoculate all clovers.**

YELLOW BLOSSOM, WORLD BRAND

Yellow Blossom is probably more tolerant to adverse weather conditions than the White Blossom. It normally matures about 3 weeks earlier and seems to be more dependable in the production of seed. Our World Brand quality is the finest available. Sow in the spring 12-15 lbs. per acre. Small lots: 5 lbs. \$2.00; 10 lbs. \$3.50 POSTPAID. See **Item No. 86** for Larger Quantities.

ITEM
NO. 86

TALL TYPE, MOSTLY WHITE BLOSSOM

Probably more widely used than the yellow and is preferred by many because it provides pasture later during the second year of growth. In a Nebraska test, Yellow provided 187 steer days of pasture compared with 224 for White Blossom during the second year. Both types appear equal for soil improvement. Prices: 5 lbs. \$2.00; 10 lbs. \$3.50 POST PAID. Quantity Prices **Item No. 83** on Price List.

ITEM
NO. 83

SPECIAL MIXED SWEETCLOVER

Mixed Sweet Clover is just as good as either of the above types for soil improvement. Our mixed lots generally are predominately yellow. The germination may run a few points below our better grades. Sow 12-15 lbs. per acre. See **Item No. 78** on Price List.

ITEM
NO. 78

ALSIKE CLOVER

Alsike grows well on many soils but seems to be better on heavy wet types. It is somewhat tolerant to an acid soil condition. Alsike should be sown in the spring at about 5 to 7 lbs. per acre if used alone. Many prefer to mix Alsike with Timothy and Red Clover in which case you should use 2-3 lbs. of Alsike. The inclusion of Timothy is desirable since Alsike is weak-stemmed and is inclined to lodge. The Timothy also is beneficial in curing for hay. Alsike will many times produce heavy hay crops on low land where Alfalfa and Red Clover fail. The feeding value is high and compares favorably with Red Clover. It is one of the most economical seedings.

WORLD BRAND ALSIKE—ITEM NO. 54

Our World Brand grade is our top quality-beautiful dark green, plump seeds. Very high in germination and free from noxious weeds.

PRICES: 5 lbs. \$3.00; 10 lbs. \$5.00 POSTPAID. For Larger Quantities see **Item No. 54** on our Price List.

UNIVERSAL BRAND ALSIKE—ITEM NO. 52

This grade is nice new crop seed but generally contains about 2 or 3% of other crop seed like White Clover, Timothy, or maybe just a trace of Sweet Clover. Germination is high.

PRICES: 5 lbs. \$2.75; 10 lbs. \$4.75 POSTPAID. See **Item No. 52** on Price List.

WINTER OR HAIRY VETCH

Hairy Vetch can be grown in almost any section of the country. It is winter hardy and seems especially well-adapted to sandy soils. Vetch is used extensively as a cover crop and for soil improvement. Because of its vining tendencies, it is difficult to cut but it is palatable as both hay and pasture. Hairy Vetch should be seeded in the fall at about 30 lbs. per acre. It can be broadcast or drilled and should be covered only sufficiently to insure moisture to cause germination. Be sure to inoculate.

PRICES: 5 lbs. \$2.40; 10 lbs. \$4.30 POSTPAID. For Larger Quantities, see **Item No. 68**.

LOT DO MORE SWEET CLOVER

Do More is our lowest priced Sweet Clover and a real value at our low, low price Naturally, it is not the bright large seed like our World Brand grades but many of our customers use nothing else. Actually, the smaller seeds make up for the difference in germination since you get about 20% more seeds per pound. Lot Do More is mixed but the White Blossom is pre-dominate. Sow 12-15 lbs. per acre. See **Item No. 80** on our Price List.

ITEM
NO. 80

MADRID

ITEM
NO. 90

A relatively new strain of Yellow Blossom that seems to be superior to the regular Yellow Blossom in several ways. It grows faster after seeding and has stronger seedling vigor which is beneficial in establishing heavy producing stands. The foliage during the first year growth is less susceptible to frost injury than other strains which permits later pasturing. The second year growth is leafier and more productive and is several days later. Madrid is also a dependable seed producer. Prices are only slightly higher than our other World Brand varieties. POSTPAID PRICES: 5 lbs. \$2.00; 10 lbs. \$3.00. See **Item No. 90** on our Price List for Larger Quantities.

BERRY'S INOCULATION

Our own special culture formulated exclusively for Gro-Coated seed. Guaranteed to contain more live bacteria. Easy to use—apply dry, no mixing necessary. For Alfalfa, Red Clover, Sweet Clover, and Alsike.

1 Bu. Size 60c; 2½ Bu. Size \$1.20 POSTPAID.

LESPEDeza

KOREAN TYPES

The Korean types of Lespedeza are most useful for hay and pasture. The area of adaptation is somewhat limited. We do not recommend sowing Lespedeza further north than central Iowa, Illinois, and Indiana. It is grown extensively in Oklahoma and Kansas, across Missouri and eastward to the coastal states. Lespedeza is quite profitable as a cash seed crop. It will stand close grazing and at the same time, reseed abundantly.

The seed generally does not mature until after heavy frosts in the fall. The feeding value of Lespedeza is very high and it is successfully raised on thin unproductive soils. It is highly advisable to inoculate original seedings of Lespedeza for best results.

EARLY STRAIN 19604

ITEM NO. 75—The early strain will probably grow and mature farther north than the regular. It also grows somewhat taller. 19604 is hulled and scarified to assure faster germination; Gro-Coated to assure better, more vigorous stands. 5 lbs. \$2.25; 10 lbs. \$3.75 POSTPAID. See Price List for Larger Quantities.

REGULAR KOREAN SCARIFIED

ITEM NO. 72—Regular Korean is recommended for areas similar in latitude to southern Iowa and on south. The regular types mature a little faster than the 19604 type. Makes an excellent summer pasture high in nutritive value. Scarified seed goes ½ further than the unhulled and will germinate faster. Sow in the spring about 15 lbs. per acre.

POSTPAID PRICES: 5 lbs. \$2.25; 10 lbs. \$3.75.

For quantity prices see **Item 72** on price list.

UNHULLED KOREAN

ITEM No. 70—The unhulled seed is slower in germination but in its adapted area will produce just as good results as the scarified. Sow about 30 lbs. per acre very early in the spring. See **Item No. 70** on Our Price List.

CLOVER & GRASS MIXTURES

5-WAY MIXTURE

ITEM NO. 100

Here is an ideal combination of legumes and Timothy containing just the right amount of each for maximum production and feeding value. It contains 65% legumes consisting of 23% Alfalfa, 20% Alsike, 20% Red Clover, and 2% Ladino, all hardy, high grade seed. The balance of the mixture is carefully selected Iowa and Missouri grown Timothy. Our 5 Way contains no Sweet Clover. If you were to buy straight lots of seed for mixing into a blend of this kind, you would pay 15 to 20% more. We occasionally are offered mixed lots of seed from western growers at a good discount. We add enough of the necessary straight lots to conform to the above specifications. That is the reason we can offer this mixture at such an attractive price. We recommend sowing 9-10 pounds per acre.

Postpaid Prices: 5 lbs. \$2.75; 10 lbs. \$5.00. For larger quantities, see Item No. 100 on our price list.

MARVELOUS MIXTURE

75% LEGUMES — 25% TIMOTHY

ITEM NO. 95

Our heaviest producing and largest selling mixture. Can be used for hay, pasture, or plowing under. Contains about 25% Alsike, 15% Alfalfa, 25% Sweet Clover, 10% Red Clover, and a small amount of Ladino with the balance, Timothy. Only hardy, carefully re-cleaned seed goes into our marvelous mixture. This seeding should last several years and under normal conditions, should grow well on just about any type soil. We recommend sowing about 10-12 pounds per acre, which will average about 80 seeds per square foot. You will be amazed at the tall dense growth you can get from this combination. Marvellous Mixture is a real soil builder, too. The Sweet Clover opens up the soil. The Alfalfa, Red Clover, and Alsike store nitrogen in the soil. The Ladino fills in the lower growth. It is Gro-Coated to give you added protection and better assurance of vigorous, heavy stands.

Postpaid Prices: 5 lbs. \$2.75; 10 lbs. \$4.75. For larger quantities, see Item No. 95 on our price list.

BASIC NO. 1

ITEM NO. 107

An all purpose seeding that will last for several years. Basic No. 1 is predominately grasses but contains 25% hardy Alfalfa and 5% Ladino, just the right amount of legumes to make a perfectly balanced mixture. The grasses have been selected to give maximum production during the entire growing season. These grasses are Brome, Tall Fescue, Orchard Grass, and Timothy. Orchard Grass starts very early in the spring and then continues until frost. Tall Fescue reaches its maximum growth by midsummer. Timothy and Brome provide pasture practically entire season. We recommend sowing 16 to 20 pounds per acre and it can be seeded in the spring or early fall. Basic No. 1 is adapted to most any area and by adding a little Alsike and Reed Canary grass, it should do well on low, poorly drained areas.

Postpaid Prices: 5 lbs. \$2.75; 10 lbs. \$5.00. For larger quantities, see Item No. 107 on our price list.

CROPS FOR QUICK GROWTH

GREENLEAF SUDAN GRASS

ITEM NO. 228

An outstanding new release that is leafier and has decidedly more plant vigor than other varieties. The many dark green leaves are succulent and sweet tasting to livestock; yet, Greenleaf Sudan has a low hydrocyanic content which means less danger of prussic acid poisoning. It matures somewhat later than most varieties which makes it a more desirable crop for late summer pasture. Greenleaf has good resistance to leaf diseases which can be an important factor in many areas. In cultivated rows, we recommend 10 pounds per acre; if broadcast, 20-30 pounds per acre. Do not plant until after the soil becomes warm in the spring.

Postpaid Prices: 5 lbs. \$1.75; 10 lbs. \$3.25. For larger quantities, on our price list. see Item No. 288 and 289

PIPER SUDAN ITEM NO. 229

Piper was developed in Wisconsin a few years ago and many prefer it because it stays green longer than most other varieties. It is disease resistant and is low in glycoside content which makes it less dangerous with respect to prussic acid poisoning. Piper is not as sweet in flavor as Sweet Sudan but livestock eat it readily. It has a tremendous carrying capacity and will stand heavy grazing. One very important feature is its remarkable adaptation to cool climate. Highly recommended for northern Iowa, Wisconsin, Michigan, and northern Illinois, and Indiana. Sow when soil is warm in spring. 10 pounds per acre in rows of 20-30 pounds per acre if broadcast.

Postpaid Prices: 5 lbs. \$1.75; 10 lbs. \$3.25. For larger quantities, on our price list. see Item No. 229 and 230

SWEET SUDAN ITEM NO. 231

A very popular type Sudan grass in Iowa, Missouri, and Illinois. It has a very sweet flavor to livestock and as a result, dairy cattle eat it readily. It is considerably higher in glycoside content and should not be pastured during extreme drouth periods or after heavy frosts. It stools freely and will produce heavy dense forage. Seeding recommendations are the same as Piper.

Postpaid Prices: 5 lbs. \$1.75; 10 lbs. \$3.25. For larger quantities, see Item No. 231 on our price list.

MILLETS

GOLDEN OR GERMAN

ITEM NO. 225

A heavy growing type of foxtail millet valuable as an emergency catch crop. Golden Millet makes a quality of hay comparable to Timothy and it seems to be relished by livestock. Grain from Golden Millet is palatable and has 83% the feeding value of corn. Millet is a warm weather crop and generally should be seeded two to four weeks after corn. Sow 30 or more pounds per acre with an ordinary grain drill. Cut for hay just before the first heads appear. Harvest for grain when the seed in the upper half of the heads are mature.

Postpaid Prices: 5 lbs. \$2.00; 10 lbs. \$3.25. For larger quantities, see Item No. 225.

PROSO MILLET

ITEM NO. 229

Proso is more palatable as a grain than the foxtail type millets. It is readily eaten by all livestock and when ground, has the same feeding value as barley and corn. Proso differs from Golden in that it has an open panicle type head. Used principally for grain. Seeding and harvesting recommendations are the same as for Golden described above.

Postpaid Prices: 5 lbs. \$2.00; 10 lbs. \$3.25. For larger quantities, see Item No. 227 on our price list.

BILLION DOLLAR GRASS

(JAPANESE MILLET)

ITEM NO. 232

A phenomenal yielder of grain or green feed. Seeding recommendations same as German Millet above. Use for emergency hay crop. Matures in 6 to 8 weeks. Excellent feed for migratory waterfowl.

Postpaid Prices: 5 lbs. \$2.00; 10 lbs. \$3.25. For larger quantities, see Item No. 232 on price list.

HYBRID Sorghums

Hybrid Sorghums are increasing in popularity every year. Increased yields, rapid growth, tolerance to dry conditions, resistance to insects and disease, and faster maturity are just a few of the most important advantages of hybrid sorghums over the old types. Even though we may offer Certified seed it is possible that you may occasionally see an off-type plant and we assume no responsibility or liability for the presence of such plants in your field.

GM BRAND 333 VERY EARLY

Our very earliest variety and one that can be grown in the Dakotas, Northern Iowa, and N. E. Nebraska. Should mature 10 days or more earlier than our other varieties. Heavy yielding with loose spreading head which is conducive to faster drying. Not Certified. POSTPAID prices 5 lbs. \$2.50; 10 lbs. \$4.00. See Item No. 243 for other prices.

GM BRAND 444 EARLY

Matures about the same time as Redbine 60 and about 1 week earlier than 666. Excellent yielder and just right for combining. Grain is a very light red color. For Central Iowa and similar areas. Use about 10-12 lbs. per acre in areas of average moisture and 6-8 in more arid regions. POSTPAID prices: 5 lbs. \$2.50; 10 lbs. \$4.00. See Item No. 240 for larger quantities.

GM BRAND 666

Item No. 241—Matures about the same time as Martin Milo. We believe our 666 Brand will outyield all the other grain sorghums in this class. We recommend it for Southern Iowa, Central Illinois and similar areas. It is a very popular number in Southern Nebraska and Kansas. Should outyield Martin Milo by 50% under favorable conditions. Has the characteristic open type head of all Hybrid Sorghum. POSTPAID prices: 5 lbs. \$2.50; 10 lbs. \$4.00. See Item No. 241 for other prices.

ATLAS SORGO

A highly drouth resistant crop that we might term as being a sweet stalk grain sorghum. Produces tremendous yields of fodder. In dry seasons it has out-produced corn and grain yields 3 to 1. Juice from the sorgo is very sweet. It is palatable nutritious feed. Corn if injured by drouth will stop growing, but Atlas on the other hand will start up again. It has good resistance against lodging. Plant 8 to 12 pounds per acre at corn planting time or after, in rows 40 inches apart. Often cut before frost and shocked to cure. Item No. 220 on our price list. Small amounts, postpaid. 2 lbs. \$1.00; 5 lbs. \$2.25; 10 lbs. \$3.75. See Item No. 241 for other prices.

NORKAN ITEM NO. 221

Sometimes referred to as early Atlas because it resembles it so closely but matures about 2 weeks earlier. Can be grown farther north than Atlas but doesn't produce quite the tonnage. Drought resistant and good for ensilage or grain. Should mature in about 105 days and generally reaches a height of about 6 feet. It is a selection from a cross of Atlas and Early Sumac. Plant about 8 lbs. per acre generally about a week after corn is planted. Responds well to fertilization. POSTPAID prices: 5 lbs. \$2.00; 10 lbs. \$3.50. See Item No. 221 for other prices.

HEGARI ITEM NO. 217

A grain sorghum that grows to a height of about 4 1/2 ft. but may vary with soil conditions and growing season. Matures in about 110 days. Produces high yields of grains with heads 7 to 8 inches long and 3 inches in diameter. Fine for ensilage or fodder and is drought resistant. The grain is distinguished from other sorghums by the white color with brown spots. Planting recommendations similar to Norkan described above. Sometimes cured and shocked for winter feed. POSTPAID Prices: 5 lbs. \$2.00; 10 lbs. \$3.50. Quantity prices Item No. 217.

NORGHUM ITEM NO. 219

Developed by South Dakota and consequently is a very early type. Should grow about 4 ft. high which makes it ideal for combining. Can be planted farther north than most of the other grain sorghums. Should mature satisfactorily in Northern Iowa or south and similar areas. Where later varieties fully mature they can be expected to outyield Norghum. Small quantities POSTPAID: 5 lbs. \$2.00; 10 lbs. \$3.50. For larger quantities see Item No. 219.

REDBINE 60 MILO

Item No. 222—A short season drought resistant grain crop. The feeding value of Redbine 60 is comparable to corn. It will yield about the same as corn on comparable land and under similar conditions. Average height 3 to 3 1/2 ft. It is red-seeded and combines easily. We recommend Redbine 60 as a wonderful grain crop in areas where rainfall is normally short. Planting rates vary from 6-12 lbs. Redbine 60 should bloom about 60 days after planting. Small quantities POSTPAID: 5 lbs. \$2.00; 10 lbs. \$3.75. For larger quantities see Item No. 222 on price list.

DWARF ESSEX RAPE

ITEM NO. 233

Rape is an outstanding emergency pasture crop. Comparative tests show that it compares favorably with Alfalfa in producing rapid and economical gains with hogs. Hogs pastured on Rape have an unusually thrifty appearance. Rape is also a desirable pasture for sheep. A combination of oats and rape makes an excellent pasture for ewes and lambs. A well worked, clean seedbed is best for Rape, sowing 5-6 lbs. per acre in spring or as late as midsummer. If broadcast use about 8 lbs. per acre. Plants should not be pastured shorter than 4 inches. In the fall it may be stocked to its limit. Small quantities POSTPAID: 5 lbs. \$2.25; 10 lbs. \$4.00. For larger amounts see Item No. 233.

PORK PRODUCER ITEM NO. 234

A mixture of legumes, forages and grains containing Vetch, Rape, Rye, Barley, Oats and Wheat. Sow 50 to 60 lbs. per acre early in the spring. Should provide pasture within a few weeks. Good for emergency summer pasture. See Item No. 234.

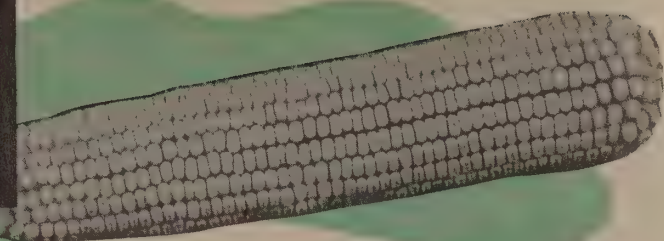

NO HUNTING- NO TRESPASSING SIGNS

Post your farm with permanent 28 gauge steel, baked enamel signs. 4x16 inches. Red background with white letters. Your choice of **NO HUNTING WITHOUT PERMISSION** or **NO TRESPASSING**. Each 49c; 6 for \$2.39; 12 for \$4.50 POSTPAID.

BATTERY CARRIER

Handy and safe way to remove or carry batteries. Works on 6 or 12 volt types. Molded metal handle — strong reinforced rubber and plastic strap with heavy gauge metal holders on both ends. 69c each POSTPAID.

HYBRID CORN

There are many different kinds of Hybrid Corn offered to farmers today. Most of them are good and some are not so good. Here at Berry's we believe we have the very best in pedigrees, production and grading. We know we have one big advantage that the rest of the corn companies do not have and that is our exclusive Gro-Coat protection that you get with every bushel of Berry's Hybrids. It assures you of better seedling vigor and faster germination—so essential to strong healthy plants. You can depend on Berry's fresh, new crop accurately graded hybrids.

BERRY'S EARLY HYBRIDS

BERRY'S 390—Our Earliest. (Area 1)

It took just 12 years of intensive research to perfect this outstanding 90-day number. 390 has excellent standing ability, shells out well and has proven itself in actual field tests under varying conditions throughout the area where short season hybrids are needed. We consider 390 an 85-90 day type.

BERRY'S 492 (Area 1)

If we were to pick our best yielding and generally all around champion in the early class it would be 492. It has all the fine characteristics you desire—short, stiff stalks; deep kernels on large, well-filled ears; uniform ear height and excellent standability. You will be more than pleased with 492. Recommended where a 95 day corn is needed.

BERRY'S 401 (Area 1)

One of our newer numbers that is rapidly becoming more popular. It has long slender ears and picks very clean. Amazing shell-out percentage. It cures rapidly in the field yet has excellent seedling vigor. We consider it in the 90-95 day class. Best on thin to medium fertility soils.

BERRY'S 409 (Area 1)

Last season we had just a few hundred bushels of this number in northern Iowa, southern Minnesota and northern Illinois. The performance of 409 was so outstanding that we have included it in our main line this year. Its best features are large, well-placed ears, top yields, excellent feeding qualities and extra strong stalks. We consider 409 as a 92 day number.

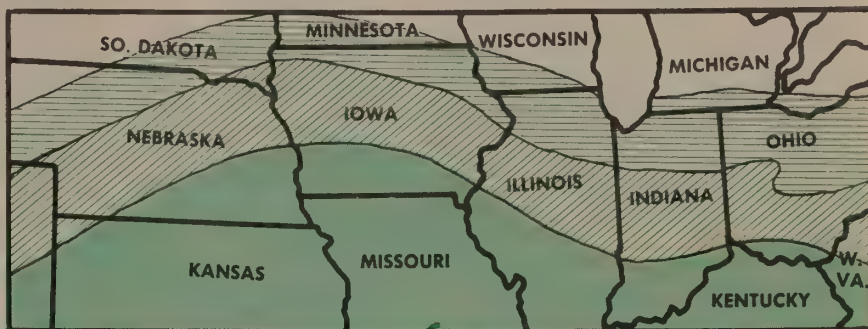

BERRY'S 525 (Areas 1 & 2)

One of our old reliables. 525 has been a dependable producer for several years under all conditions. It is very widely adapted being at home on thin soil as well as extra heavy types, and responds well to heavy fertilization. You simply can't go wrong when you choose 525. Normally matures in 100 days. Excellent for ensilage in northern areas.

BERRY'S 535 (Area 2)

A tower of strength is a modest description of the stalk on this variety. A deep-kerneled, heavy ear is carried at just the right uniform height for clean, easy mechanical picking. Extra good yields, high shell out percentage, and strong stalks are just a few of the fine features of 535. Try it this year. 100-103 days.

MEDIUM MATURING HYBRIDS

BERRY'S 618 (Areas 2 & 3)

Without a doubt our most popular and largest selling medium maturing hybrid. We will put it up against any other hybrid of comparable maturity. Extra long ears with deep kernels. Holds ears exceptionally well. Widely used as a full season corn but actually matures in about 106 days. Be sure to include this one in your farming plans this year.

BERRY'S 680 (Areas 2 & 3)

Another new number that replaces our popular 625. Strong medium height stalk, large, well-placed ears. Stands heavy planting and increased fertilization. Amazing yields on heavy soils. Very limited supply of this number—order early as we know you will want to try this one. 108 days. Very leafy, good for ensilage.

BERRY'S Full Season HYBRIDS

BERRY'S 813 (Area 3)

Still our most popular full-season number. Longer pollination period insures larger, well-filled ears. The best hot-weather hybrid that consistently produces bin-filling crops even under drouth conditions. Tall, stiff stalks hold ears up well with a very low percentage of droppage. Will stand heavy planting. 112-115 days.

BERRY'S 829 (Area 3)

Produces tremendous ears but needs heavy soil. Heavy planting and fertilization will produce championship yields. Very deep kernels on uniformly placed ears that pick clean. You won't find 829 on the ground. High shell-out, and excellent feeding qualities. 115-118 days.

SEE GREEN LIST FOR PRICES OF BERRY'S HYBRIDS

ASK FOR OUR BERRY HYBRID CORN CIRCULAR

SPRING GRAINS

NEW IMPROVED VARIETIES FOR 1961

GOODFIELD OATS

Goodfield is a pure line selection from a cross of Clintland X (Garry x Hawkeye)—Victoria, developed by the Wisconsin Agricultural Experiment Station, in cooperation with the Quaker Oats

Company. Goodfield was developed for rich ground and should be planted on high fertile soil where lodging is a major problem. It is mid-season in maturity, good in yield, very high in test weight, it is short strawed, and stands up well being highly resistant to lodging. It is resistant to smut, to all races of stem rust and to the crown rusts that are prevalent throughout the mid-west regions.

Goodfield has been an outstanding yielder in the areas where it has been tested and has carried a good test weight being superior to fourteen other varieties tested in a three state area. If you have had trouble with oats lodging in the past, Goodfield would be the proper oat for you to plant as it has extremely good straw strength.

There are several new varieties available for planting this spring, but we consider Goodfield superior to all of these with the possible exception of Nehawka described in the opposite column. Supplies of Goodfield are quite limited this season and we suggest that you send us your order early in order to assure your getting top quality certified seed. Prices are quoted f.o.b. Boone, Iowa; Streator, Illinois; and Marion, Ohio. There is no freight allowance on spring grains, although we can ship them with any other items that you may need prepaid and we can bill you for the shipping charges. (Sorry we must limit your purchase to 30 bu. per customer.)

See Item No. 173 on Price List.

NEWTON OATS

While this variety is not as new as Goodfield and Nehawka it has consistently been at the top of test plots throughout the midwest region. It is a cross of Indiana (Nemaha x Clinton) (Boone x Cartier). It compares closely to Clintland but has better crown and stem rust resistance.

The grain has a very high test weight with large, plump oats with moderately heavy hulls, and the kernels are about a quarter of an inch shorter than Clinton 59 and Clintland. It matures about the same time as Nemaha and Clintland. Newton is also resistant to smut and Victoria blight.

While we have offered Newtons for the past two years, we never seem to have enough of them to satisfy the demand which speaks well for this outstanding variety. We offer Newton oats from Streator, Illinois, and Marion, Ohio, as we consider them better adapted to those areas than to the Iowa, Nebraska and Missouri region.

For Prices See Farm Seed List, Item No. 177

KINDRED BARLEY

Kindred is a 6 rowed, rough awned, early maturing variety. A wonderful feeding barley and is acceptable also as a malting variety. Kindred is widely recommended and has been consistently superior in yields for several years. Resistant to stem rust, spot blotch and net blotch. Barley makes a fine nurse crop for grass and clover seedings and the feeding value of the grain is better than oats or wheat. We recommend Kindred for Illinois, Iowa, Minnesota, Wisconsin, North and South Dakota and Northern Indiana. See Item No. 191 on our price list.

TRAILL BARLEY—NEW

Traill is a newer variety that is equal to Kindred for malting purposes but has shown a higher yielding capacity. The kernels are slightly smaller than Kindred. It has moderately stiff straw, is medium in height and resistant to stem rust. Traill was developed in North Dakota and we recommend it for the entire spring Barley producing area. For prices see Item No. 192 on our price list.

IT PAYS TO SOW CLEAN PURE SEED OATS

The investment you make in raising a crop of oats without considering seed costs amounts to a great deal of money. Labor costs, gas, machinery, depreciation and all of the other items that go into the preparation of the seedbed. Protect your investment with Berry's **EXTRA QUALITY** seed oats. Use our proven recommended varieties and dependable seed. It will pay big dividends in bigger yields over "bin run" seed of questionable quality and germination.

NEHAWKA OATS

Nehawka is a newly released variety from the State of Nebraska. In 1959 and 1960 it was outstanding over other varieties such as Nemaha, Cherokee, and Clintland. Since 1956 it has consistently produced more than Nemaha and Cherokee in all sections of the State of Nebraska. It is a selection from Cherokee that was made back in 1950 and looked so outstanding at that time that carefully hand rowed selections were made for crop increase until the present time when it is available on a commercial basis. It is slightly earlier and somewhat shorter than Nemaha. Its maturity is early, with very strong straw, high test weight, and about 2 to 3 inches shorter than Nemaha. It is resistant to races 7 and 7a of stem rust and tolerant to crown rust. It has slight susceptibility to race 8 of stem rust.

We especially recommend the Nehawka for the southern half of Iowa, all of Nebraska, north central Kansas, northern Missouri and other oat producing areas of this region. Nehawkas are offered only f.o.b. Clarinda or Boone, Iowa.

See Item No. 174 on Price List.

Rushmore Spring Wheat

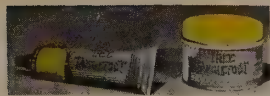

Rushmore was developed and raised by the South Dakota experiment station in 1959. It is a cross of Rival x Thatcher and because of its early maturity, it can be used in mixed seedings with Barley or Oats. Yields have been consistently on a level with any other recommended spring varieties in Iowa; and in South Dakota, it has been superior to all other varieties tested. It is beardless, early maturing with mid-short stiff straw. It is moderately resistant to stem rust (except race 15B) loose smut and bunt. It is slightly susceptible to leaf rust. Rushmore spring wheat is offered from our plant at Boone, Iowa, only and is quoted f.o.b. there with no freight allowance. We can ship with any of your other orders prepaid and bill you later for any shipping charges. Packaged 90 pounds per bag.

For Prices See Item No. 198.

HENRY SPRING WHEAT

A bearded, hard red spring wheat, midseason in maturity and resistant to hessian fly, mildew and loose smut. Henry is the highest yielding spring wheat we know of but it has only fair milling and baking qualities. It is used primarily as a feeding variety. The straw is medium tall, fairly stiff and the grain does not easily shatter. Henry was developed in Wisconsin and we feel it is recommended more for northern Iowa, Minnesota, Wisconsin and similar areas. Where winter wheat can be grown it will yield better than the spring varieties and is better for milling purposes. For prices see Item No. 199 on our price list.

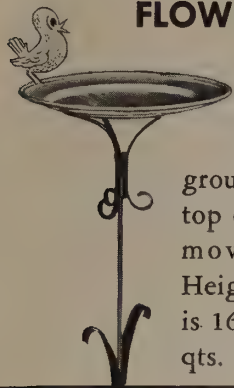

TREE TANGLEFOOT

For safeguarding trees and vines against destructive climbing and creeping insects. Control of Canker Worms, Caterpillars, Climbing Cutworms and many others. Apply directly to trees in bands about 3 in. wide. Remains sticky when fully exposed to weather.

SPECIAL SERVICE ON FARM SEED ORDERS

If you live within the outlined areas of the map below we will prepay your order via rail freight if it amounts to 300 lbs. or more, spring grains excepted in accordance with the conditions as stated on the accompanying price list. Commercial truck rates are somewhat higher than rail freight but normally delivery is much faster. If you prefer truck shipment **BE SURE** to tell us where your order can be delivered — your local feed

store, grocery or filling station is satisfactory. We will be glad to **PREPAY** by truck and bill you for the difference between rail and truck rates. If you live outside the shaded area you may **DEDUCT \$1.25 per cwt.** from your order as a freight allowance and we will ship collect. We **RECOMMEND** truck shipments where possible but you **MUST TELL US** a business house or address where we can deliver as many towns do not have commercial truck terminals.

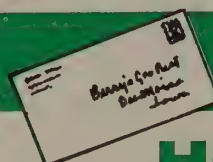

IT PAYS TO ORDER FROM BERRY'S

Compare our prices with your local dealer or with other mail order suppliers. Remember you can make **ONE ORDER** at BERRY'S take care of all your needs, whether it be for farm seeds, garden or flower seeds, hybrid corn, nursery stock, vegetable plants or bulbs. **ALL ORDERS FOR NURSERY STOCK, GARDEN SEED OR ALLIED PRODUCTS ARE SHIPPED EITHER POSTPAID OR PREPAID EXPRESS.** Every order placed with Berry's carries our liberal guarantee. Planting instructions are included with every order. Every order, regardless of size, is promptly acknowledged and will have every careful attention. You will enjoy ordering from BERRY'S, where you can be sure of service, quality and low prices.

IT'S *So Easy + Economical*

Let one order from Berry's take care of all your requirements; fruit trees, rose bushes, shrubs, bulbs, garden seed, farm seed, and plants. When you buy from Berry's you get the extra advantage of sixty years of experience in all phases of the seed and nursery business. We have specialists in every department who are willing and eager to help you with any of your planting problems. Our thousands of satisfied customers have learned to expect the extra quality, prompt service and extra savings they get with every single order. **WHEN YOU BUY FROM BERRY'S YOU NOT ONLY EXPECT THE BEST BUT YOU GET THE BEST.**

TO ORDER BY MAIL

HOW TO PAY

Please enclose check or money order with your order to insure the best possible service. Every order is quoted prepaid either by parcel post or express, with the exception of farm seed. Special prepaid allowances are made on farm seed as per the schedule on the enclosed price list. Occasionally we may be temporarily out of the exact item you order and rather than delay your shipment we will substitute one of equal or better quality, unless you specify "no substitution." We prefer not to make any C.O.D. shipments and an extra handling charge of 50c will be assessed on all such orders.

HOW TO ORDER

Here at Berry's you can order all of your requirements on only one order blank whether it be for rose bushes, fruit trees, farm seed, garden seed or any other items that we offer. If you have misplaced the order blank enclosed with this catalog any sheet of paper will do. A self-addressed envelope is also enclosed for your convenience. **Be sure to include your complete name and address along with complete information as to your most convenient station for freight, truck or express shipment.**

SALES TAX

There is no sales tax on farm seed. It is necessary, however, to collect a 2% sales tax on all other items **FROM IOWA CUSTOMERS ONLY.**

THREE SHIPPING POINTS

For faster service and lower shipping costs all farm seed orders are shipped from **Clarinda, Iowa; Streator, Illinois; and Van Wert, Ohio.** We will ship your order from the closest point to you. Be sure to mail all orders to Clarinda, Iowa, and also any correspondence relative to an order. Regardless of where you live, we can supply your farm seed needs with our famous Gro-Coated Brand seed and at prices that will save you money.

ORNAMENTAL CORN

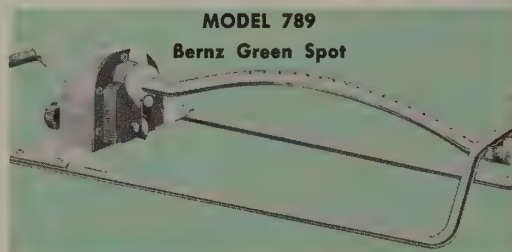

Commonly known as squaw or Indian corn. Popular for winter bouquets with decorations. Colorful, long slender ears with yellow, red, blue, white and pink kernels. Very easy to grow. Lge. Pkt. **20c**; 1/2 lb. **50c**; 1 lb. **90c**; 5 lbs. **\$4.00 POSTPAID.**

STRAWBERRY POPCORN

(not pictured)

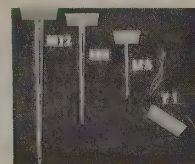

103 days. Small strawberry-shaped ears of rich dark-maroon. Sizes vary from 1"-3" long. Novel and colorful for decorations and bouquets. Pkt. **20c**; 1/2 lb. **80c**; 1 lb. **\$1.40 POSTPAID.**

OSCILLATING SPRINKLER

Precision covering as never before with this new oscillating sprinkler. Easily adjustable dial lets you select spray coverage for left-half—right-half—or complete rectangular area. Complete area covered 2,200 sq. ft. Permits watering right up to sidewalk, house or garage.

PRICE: \$9.98 POSTPAID.

PYLON PLANT MARKERS

BERRY'S NURSERY STOCK GUARANTEE

We are proud of our liberal guarantee which protects each and every purchase you make from BERRY'S. All nursery stock, perennials, bulbs, corms, roots and tubers are guaranteed to be exactly as represented in this catalog and to be true to named variety. Every shipment is guaranteed to reach you in good planting condition, and to grow, provided that the planting instructions are followed, which are included with every order. If for any reason any item of nursery stock fails to conform to this guarantee, we will replace it with new stock, free of charges. Naturally we must restrict this guarantee to these limitations:

You must notify us within 60 days after receipt of your order of any unsatisfactory stock. BE SURE TO INCLUDE THE PACKING SLIP AND COPY OF THIS GUARANTEE WHICH ACCOMPANIES EVERY ORDER.

If your order is shipped for fall planting you must then notify us by the first blooming season following receipt of shipment.

Berry's will not, in any case, assume any responsibility greater than the purchase price of any item, as vigorous growth and yields depend upon too many conditions over which we have no control.

BERRY SEED COMPANY.

BERRY'S GRO-COATED FARM SEED GUARANTEE

We guarantee every shipment to be satisfactory and to meet all the requirements of both your state and federal seed regulations. If for any reason, you are not satisfied with the seed we have shipped to you, just let us know within 30 days after receipt and you may return at our expense for full refund plus any shipping charges. We cannot be responsible for stands or yields as that is dependent upon too many conditions over which we have no control. Our liability in all instances is limited to the purchase price of the seed.

DOZENS OF USES

SHOE SENTINEL

8" wide
12" overall ht.
1" deep

Steel scraper bar sends soil and sand flying! Side brushes remove last clinging particles. A must where youthful feet scamper in and out. Black rust proof steel frame and scraper bar. Easily installed near any entrance. Plastic bristle brushes last for years! Guard polished floors and valuable carpeting from grit and grime. Neat and decorative. Each **\$3.39 POSTPAID.**

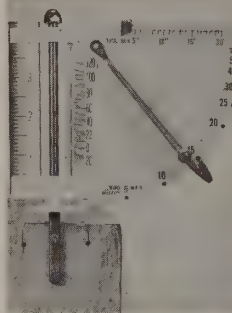

SEYMOUR HEAVY DUTY SEEDKASTER

Zinc grip, rust-proof steel is used in all the main parts. Body one piece drawn steel. No seams—no welts. No wood to split or warp. Gears are sealed in the dustproof chamber and permanently lubricated. Easy to operate. Capacity 18 quarts. POSTPAID PRICE. **\$8.25.**

WEATHER GAUGE

Educational — Fun to Watch

Accurately measures rainfall and has indicator for accumulating rainfall for any given period. Gives temperature also wind direction and speed. All gauges are accurately calibrated by national testing laboratory and are evenly mounted. Mailed in specially constructed heavy corrugated box to insure guaranteed safe delivery. POSTPAID PRICE **\$1.59.**

PORTABLE GREENHOUSE

Enables you to be as much as 6 weeks ahead of the planter using ordinary methods. Wonderful for starting potted plants and most other plants and flowers outside. Enables the sun rays to enter, but keeps out frost and cold. Will last many years. Will not crack or peel. 5 ft. length, **\$1.95, Postpaid.**

IRI-GATOR

Scientifically engineered watering instrument containing an intricate series of baffles which changes destructive hose pressure into gentle, aerated flow that quickly penetrates deep into soil. Eliminates soil erosion and exposed roots. 3 times faster than sprinkler or nozzle yet uses less water. Saves time and trouble. Just attach to any ordinary garden hose for instant use. Break-proof.

Each **\$1.79 POSTPAID.**

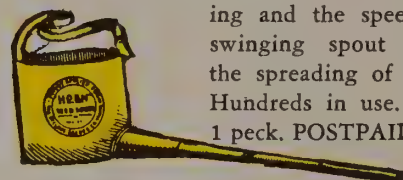

CRAWLS NO MORE

New Aerosol tree banding compound ends messy job of daubing sticky compounds around trees. Lets you finish job in less time than it used to take to open can. Traps all types crawling insects. One treatment lasts entire season. 14-oz. Aerosol can.

Each **\$2.39 POSTPAID**

HORN SEED SOWERS

The simplest of all seeders. No gears, no moving parts. Seed flows into spout which the sower swings back and forth as he walks. This seeder is adjusted by changing the size of the spout opening and the speed of the swinging spout regulates the spreading of the seed. Hundreds in use. Capacity 1 peck. POSTPAID **\$1.95.**

RAT BAITS THAT WORK

WARFARIN TYPE

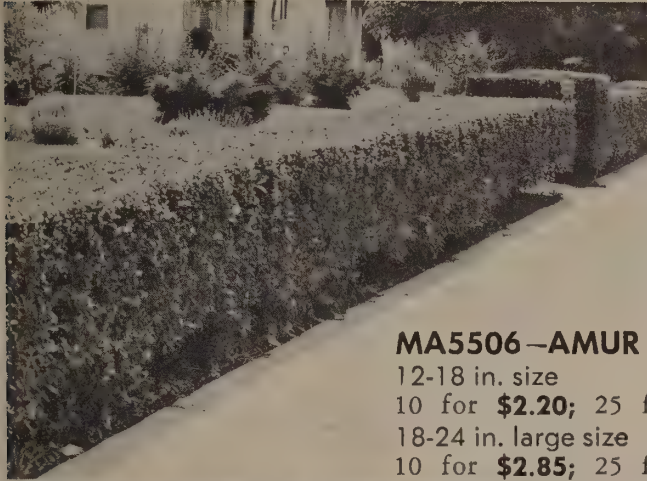

MEAL BAITS. A ready to use meal type bait scientifically mixed with fresh high grade grain and just the right amount of Warfarin to really do the job. Proven to be most attractive to rats and other rodents. Excellent control assured when the directions are closely followed. Positive control within four to eight days when adequate supplies of fresh feed are kept at feeding stations. POSTPAID PRICES: 1 lb. **80c**; 2 lbs. **\$1.49**; 5 lbs. **\$2.85.**

PELLET TYPE BAITS. The same formulation as above, but bait is pressed in small bite-sized pellet form. Experiment stations recommend this type bait as giving most effective control. Rats love it. Less waste than with grain type baits. Easy and economical to use. POSTPAID PRICES: 1 lb. **95c**; 2 lbs. **\$1.60**; 5 lbs. **\$3.25.**

WARFARIN CONCENTRATES. Standard full strength concentrate to be mixed one part to 19 parts with fresh cornmeal, ground oats, or oat groats. More economical to use when you mix your own bait. Proven effective control. POSTPAID PRICES. $\frac{1}{4}$ lb. **\$1.75**; $\frac{1}{2}$ lb. **\$3.00.**

WATER SOLUBLE BAITS. The use of water soluble bait is highly recommended in combination with the regular Warfarin dry baits as rats will consume about three times as much liquid as they do dry feed. When used in combination positive control will be effected in much less time usually in from 3 to 5 days. Water soluble baits are easy and inexpensive to use simply by following directions. PRICE: **39c Packet, POSTPAID.**

Plant Hedges for Beauty & Privacy

PRIVET HEDGE AMUR RIVER

Most popular and widely used trimmed hedge. Easily trimmed to any desired height or shape. Hardy, long lasting, vigorous growing. Rich dark green leaves last until late fall. Plant 9 to 12 in. apart. If not trimmed will grow 12 to 15 ft. tall.

MA6566—SUPERIOR QUICK CROP. Very heavy bearer. Extra large deep red fruit when fully ripe. Clingstone type. Ripens early August.

PREPAID PRICES: Ea. \$3.25; 4 for \$12.40.

QUICK CROP ELDORADO BLACKBERRIES

Heavy caned, 2 year old transplants. Huge, juicy, jet-black berries, excellent flavor. Equally delicious for jam, jelly or pies. Hardy in most areas but may need some winter protection in extremely cold climates.

MA6817—ELDORADO. 5 for \$1.35; 10 for \$2.40; 25 for \$4.95 POSTPAID.

QUICK CROP GRAPES

More mature, heavy-caned plants with excellent root systems. Big, robust 3 yr. old plants, generally bear sooner with large clusters of grapes.

MA6615—CONCORD QUICK CROP. Popular favorite of the purple types. Very hardy and early ripening. Fruit is rich deep purple. Heavy bearing. Ea. 75¢; 2 for \$1.25; 5 for \$2.55 POSTPAID.

MA6617—NIAGARA QUICK CROP. Best of the whites. Large, compact clusters of deliciously flavored fruit. Ea. 85¢; 2 for \$1.40; 5 for \$3.25 POSTPAID.

MA6618—CACO QUICK CROP. Sweet, flavorful wine red variety. Ripens medium early. Very hardy. Ea. 90¢; 2 for \$1.60; 5 for \$3.50 POSTPAID.

ALL QUICK CROP TREES AND BERRY BUSHES LISTED ON THIS PAGE ARE AVAILABLE FOR BOTH SPRING OR FALL PLANTING.

TWO YEAR FIELD GROWN STOCK

MA6143 DELCON. A pint-sized tree that bears big-sized fruit. Trees grows about 1/2 normal size. Fruit has distinctive flavor from its parental cross of Delicious, Jonathan and Ben Davis. Fruit ripens about 2 weeks earlier than Delicious. No. 6143—4-5 ft. trees EACH \$2.45; 4 for \$9.00 POSTPAID.

MA6121 JONADEL A sensational flavored apple combining jonathan and Delicious. Beautiful bright red, blight resistant fruit. Wonderful for eating fresh and when it comes to fresh apple pie it has no equal. Retains crisp, tangy flavor all winter. 5-6 ft. trees EACH \$2.75; 4 for \$10.60 POSTPAID.

STANDARD SIZE TREES - AS LOW AS \$1.25 EACH

MA6116—DARK RED JONATHAN The flavor and all around good quality of the Jonathan apple is unsurpassed by any winter variety. Berry's healthy, vigorous trees start bearing fruit early. Large deep red fruit is excellent for eating fresh, for pies, for baking, or for jelly. Fine for winter storage, retains its firm, crisp flesh for many months.

MA6107—YELLOW DELICIOUS. Best of the Yellow apples with extra large, beautiful golden yellow fruit. A favorite among commercial raisers as well as for small home orchards. One of the heaviest bearing varieties. Unusually hardy and normally will start bearing within two to three years.

MA6119—ANOKA. Extra early bearing new variety. Trees seldom exceed 20 ft. tall when fully matured. Excellent for home use. Uniform, well-shaped trees are equally attractive in front or back yard. Fruit is delicious flavor and unsurpassed for pies or baking.

MA6108—DOUBLE RED DELICIOUS. The crisp, zestful flavor of these huge, red delicious apples are unexcelled for eating fresh. They come on early in the fall and retain their firm flesh and delightful flavor throughout the winter months. Truly America's favorite red apple.

MA6105—WEALTHY. An extra heavy bearing variety of unusually large, bright red fruit. Ripens in September and stores well for several months. A real hardy dependable producer of fine-flavored fruit. Particularly recommended for cooking or pies.

POSTPAID OR PREPAID PRICES

3-4 Ft. Size $\frac{7}{16}$ " to $\frac{9}{16}$ " Caliper trees.

Each \$1.35; 4 for \$5.00.

5-6 Ft. Size $\frac{11}{16}$ " to $\frac{7}{8}$ " Caliper trees.

Each \$2.15; 4 for \$7.80.

MA6104—RED McINTOSH. A medium sized, early fall variety. A good producer for many years. Fruit is darker red than most and the fresh extra firm, snow white color. Juicy tart flavor makes it excellent for cider, but we recommend it as being our No. 1 choice for an all-purpose apple.

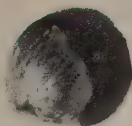

MA6113—YELLOW TRANSPARENT. One of the earliest maturing varieties. Large, yellow, tender juicy fruit ripens in mid-July. Trees are extremely hardy for any area. Mellow, spicy flavor. Excellent for pies and sauce.

MA6112—STAYMAN WINESAP. Stores better than any other winter variety. Beautiful red colored fruit with crisp delightful flavor. A heavy bearing variety of extra large sized fruit. A real favorite with home orchard growers.

KEEP THIS BOOK FOR ORDERING THE YEAR AROUND. FRUIT TREES, BERRY BUSHES, SHRUBS, ROSE BUSHES AND MOST NURSERY ITEMS ARE AVAILABLE FOR BOTH SPRING AND FALL SHIPMENT.

MA6890—HAZELNUT

Hardy bush-like trees can be grown in limited space. Seldom taller than 12-15 feet. Nuts are formed in clusters of 3 to 5. Excellent flavor for using in cookies, cakes or other desserts. Can be planted in the spring or fall. Self-pollinating 18-24-in. size plants. Each \$1.35; 4 for \$4.80 POSTPAID.

MA6899—CHINESE CHESTNUT

A popular landscaping tree. These healthy, blight-resistant trees are hardy as far north as northern Iowa and similar areas. The nuts are large sized, sweet, fine flavored. They start to bear when quite young. 2 or more tree should be planted together for proper pollination. 3 year old 2-3 ft. size. Each \$2.25; 4 for \$8.60 POSTPAID.

MA6886—Thomas Black Walnut

These healthy, fast growing trees start bearing very young. The nuts are unusually large sized and have a delicious distinctive flavor. Hardy for any area. Plant about 40 ft. apart. Supply limited. 2-3 ft. size. Each \$3.95; 4 for \$15.00 POSTPAID.

HARDY PECANS

MA6891

Hardy as far north as Central Iowa and similar areas. Plant about 50 ft. apart in spring or fall. Nuts are thin-shelled and deliciously flavored. The uniformly shaped trees have luxuriant green foliage which makes them decorative and attractive enough for your front yard. We recommend planting at least 2 or 3 for proper cross-pollination. Sturdy healthy 2-3 ft. trees.

Each \$1.35; 4 for \$4.80 POSTPAID.

NUT TREES

CARPATHIAN

ENGLISH

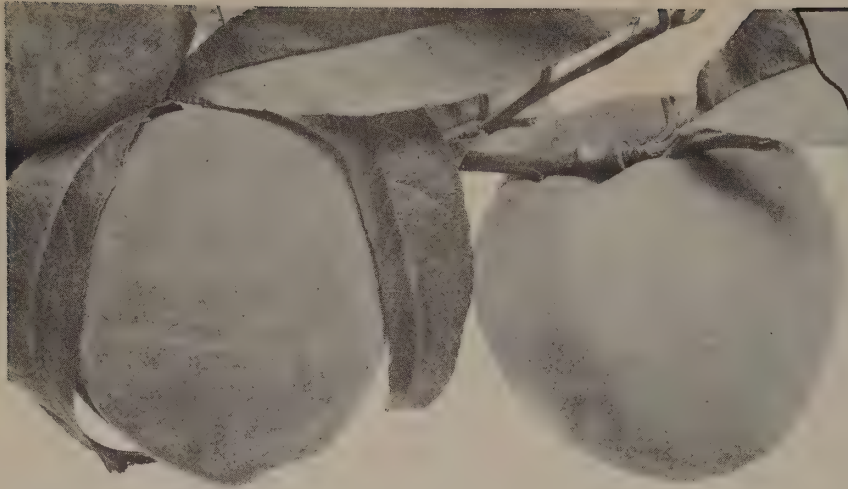

WALNUT

MA6882

A new hardy, strain of real-honest-to-goodness English Walnuts that can be grown as far north as southern Minnesota. We recommend planting at least two so they can cross-pollinate. These healthy, sturdy trees produce thin shelled, fine flavored nuts just like the ones you have been buying in your favorite grocery stores. We recommend planting about 30 to 40 feet apart. We can ship these trees in spring or fall.

MA6402 EARLY ELBERTA. Large sized, bright yellow fruit, firm juicy delectable flesh. Excellent for canning or eating fresh from the tree. A yellow freestone variety. Ripens about one week earlier than Elberta. One of the quickest varieties to bear after planting.

MA6403 ELBERTA. Yellow Freestone. A mid-season variety, very large in size, golden yellow with red cheek. Very productive, yielding large quantities of uniformly high colored fruit. Ripens early September. A very popular variety for home freezing or canning.

MA6406 HALE HAVEN. A large new yellow freestone, highly colored, with delicious rich sweet flavor. Excellent for freezing or canning and ripens about two weeks before Elberta. Self-pollinating. Hardy, vigorous trees.

MA6407 J. H. HALE. Midseason yellow freestone sometimes known as the Million Dollar Peach. Excellent flavor, tender, golden yellow flesh. Extra large size and is the "Giant" of peaches. For best results another variety should be planted in combination with J. H. Hale. A good all around peach.

MA6413 POLLY. Large pink colored fruit with white sweet delicious flesh. Has no equal for preserves or sauce. Midseason. Unusually hardy, self-pollinating, and ripens just before Elberta. Our favorite for delicious tree ripened flavor.

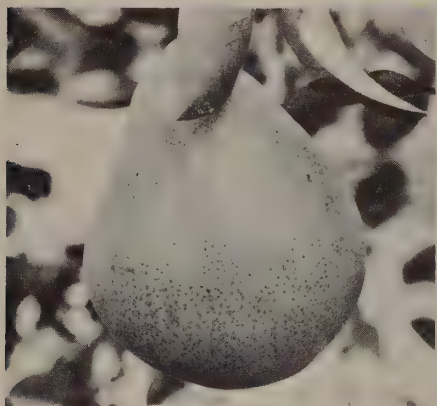

MA6405 GOLDEN JUBILEE. Extra early yellow freestone. Should ripen by July 20th. Very hardy and usually blooms after danger of frost. Bears very large fruit of excellent flavor.

DWARF APPLE

MA6149 DARK RED JONATHAN. Crisp tender juicy fruit. Ripens same time as regular Jonathan. 4½-5 ft. tall \$4.35 each postpaid.

MA6145 RED DELICIOUS. Full flavored, brilliant red, juicy fruit. Produces full size apples as regular trees. 4-5 ft. tall trees \$4.35 each postpaid.

MA6148 YELLOW TRANSPARENT. Early variety, ripening in midsummer. Produces large excellent flavor yellow fruit. Heavy producer. 4½-5 ft. tall \$4.35 each postpaid.

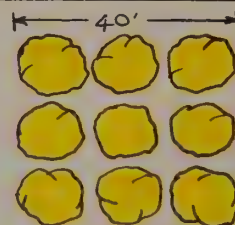

DWARF PEAR

MA6215 BARTLETT. Best of the early varieties. Excellent for tree ripened fresh fruit or canning. Good pollinator. Produces large yellow sweet flavored fruit. Prices: 3-4 ft. tall, Each \$3.35; 4 for \$13.00 POSTPAID.

MA6217 KEIFFER PEAR. Large deliciously flavored fruit. Keeps unusually well. Ripens in mid-September. Easy to grow and requires a space of only 6 ft. by 6 ft. Prices: Each \$3.35; 4 for \$13.00.

DWARF CHERRY

MA6374. An early ripening sour type cherry. Very productive. Tender bright red fruit. Extremely hardy. Trees seldom grow more than six feet tall, but bear heavily every year. Self-pollinating. Prices. 3-4 ft. size, Each \$2.95; 4 for \$10.95 shipped postpaid.

Plant several varieties of Dwarf Fruit Trees and enjoy large full sized, full flavored fruits from a very small space. It is possible to plant 9 trees in a space 36 to 40 ft. square. We recommend planting two varieties of each tree to insure pollination except the cherry trees which are self-pollinating.

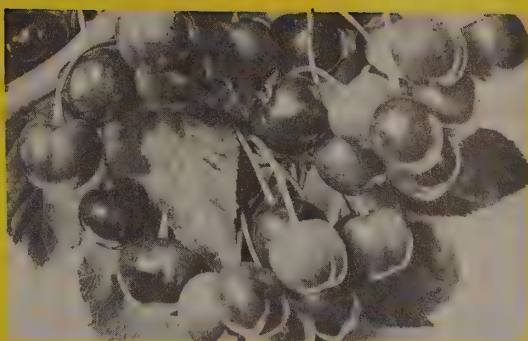

QUINTUPLET APPLE TREE

5 DIFFERENT APPLES ON ONE TREE

MA6126 Sensational new innovation in fruit trees. You can actually grow five choice varieties of apples on one tree. You get these five delicious popular varieties all in one package. Red Delicious, Yellow Delicious, Jonathan, Yellow Transparent and Winesap. These varieties are all grafted onto one sturdy, healthy trunk. Produces full flavored full sized fruit. Apples mature at different times. Full planting instructions included with each individual tree. Prices No. 6126. 4-5 ft. Trees each \$4.95; 2 for \$9.45. POSTPAID.

MA6307

BING CROSBY

Huge dark red, glossyskinned fruit. Sweet and flavorful. Good for freezing or eating right from the tree. Hardy, healthy trees. Trees are ornamental enough for front yard planting.

MA6301

BLACK TATARIAN

The most popular sweet cherry. Large, purplish black, delicious fruit. Firm, meaty and keeps well. Grows well on most soil types. Very hardy and long lived.

PRICES SWEET CHERRIES LISTED ABOVE.

3-4 ft. size. Each \$2.15; 4 for \$8.00.

5-6 ft. size, Each \$2.95; 4 for \$11.40 POSTPAID.

PLUMS

Berry's plum trees are sturdy, healthy and carefully selected, 2-year field grown stock. Only the hardiest, disease free varieties are offered and we recommend those listed below from northern Iowa and similar areas on south. Plum trees north of that area need some winter protection. For best results at least two varieties should be grown for cross pollination. Plant trees about 15-20 ft. apart. Shipped for spring or fall planting postpaid.

MA6508 STANLEY. The best of all the older prune-type plums. Large to medium size. Delightful flavor when allowed to fully ripen. Beautiful purple color when ripe — flesh greenish.

MA6507 GREEN GAGE. A very popular yellowish green fruit. Flesh pale green and very sweet flavored. Ripens mid-August. Do not raise north of Central Iowa or similar areas.

MA6506 ITALIAN PRUNE. Medium large, dark bluish purple color. Delicious flavored yellow flesh. Excellent for canning or drying and unsurpassed when fully ripe for eating out of hand.

MA6504 TOKA. Rich spicy flavored. Beautiful red fruit that ripens in August. Very hardy and vigorous. Freestone type and good producer.

MA6500 SUPERIOR. Ripens early August. Very large red fruit of excellent sweet flavor. Hardy and good pollinizer for other varieties.

MA6525 PIPESTONE. Extra large size. Rich red fruit. Very hardy, bears early. Excellent flavor for eating fresh or canning.

PRICES ABOVE PLUMS POSTPAID

3-4 ft. size. Each \$1.65; 4 for \$6.20; 5-6 ft. size, Each \$2.55; 4 for \$9.60.

APRICOTS

Berry's Apricot trees are shipped to you guaranteed to grow, carefully inspected and ready for planting. We recommend planting as far north as Central Iowa and similar areas. Apricots prefer well drained areas with an abundance of sunlight. Plant 20 ft. apart. Shipped most areas spring or fall.

MA6481 CHINESE GOLDEN. Large size, freestone apricot. Golden orange color with juicy delicious fruit. A heavy producer and vigorous grower. Fine for all purposes — eating fresh when tree ripe, canning, freezing, preserves or pies. For best pollination plant two varieties.

MA6482 SCOUT Hardy in most any area. Richly colored golden yellow fruit, delightful flavor. Because of its hardy characteristics can be successfully raised farther north than most varieties. Plant 20 ft. apart. Apricot trees are attractive additions to orchard or yard.

MA6480 MOORPACK. Ripens early in August. Freestone. A very popular variety grown widely in midwest. Unusually distinctive flavor.

Prices Above Apricots Postpaid

FOR FREEZING — FOR CANNING — FOR CORN-ON-THE-COB

271X—MELLO-GOLD HYBRID. (82 days). A brand new variety that is good for using fresh from the garden, canning or freezing. Deep, golden yellow kernels have that old-fashioned sweet corn flavor. 8-8 1/2 inch ears, 12-16 rows of kernels on sturdy, lodge resistant stalks, 6-7 ft. tall. Gardener's packet plants 2—30 ft. rows. PRICES: Large packet 35c; 1/2 lb. 70c; 1 lb. \$1.25 POSTPAID.

276X—GOLDEN CROSS BANTAM HYBRID. (88 days). The foremost, yellow hybrid and the standard by which all other sweet corns are compared. The variety preferred by market gardeners, canners and the home gardener. Large 8-9 inch ears with 12-14 rows of tender kernels. Stalks are 6-7 ft. tall and drouth resistant. Excellent variety for freezing as the kernels are firm and do not get "mushy" after freezing. The fresh, garden flavor is maintained for many months either canned or frozen. PRICES: Gardener's packet (plants 2—25 ft. rows) 20c; 1/2 lb. 50c; 1 lb. 80c; 3 lbs. \$2.25; 5 lbs. \$3.50 POSTPAID.

333—HYBRID EGG PLANT

(72 days). Strong, sturdy plants hold the fruit off the ground. Fruits are produced in abundance throughout the season. Write for our FREE easy-to-prepare recipes. Prices: Gardener's packet (36 seeds) 35c; 2 packets 65c POSTPAID.

HYBRID CUCUMBERS

244A—HYBRID SUPER SLICER. (60 days). Vigorous, heavy producing, disease resistant new hybrid. Fewer and smaller seeds. Unbelievably large yields. Pkt. 25c; 1/4 oz. 80c; 1/2 oz. \$1.40 POSTPAID.

527—Cherry Belle Radish

(27 days). Crisp, sweet cherry red radishes—all uniform size, 3/4 inch across. They will stand warm weather better and stay fresh longer than any other red variety. An All-America medal winner. PRICES: Gardener's Packet (plants 30 ft. row) 25c; 1/2 oz. 40c POSTPAID.

131—PEARLGREEN SNAP BEANS. NEW! (50 days). 1958 All American winner. Smooth, meaty, entirely fiberless pods 5-6 inches long. Picked fresh, frozen or canned their delicious flavor is unmatched. Highly productive even under drouth conditions. PRICES: Gardener's packet (plants 36 ft. row) 30c; 1/2 lb. 60c; 1 lb. \$1.00; 3 lbs. \$1.80 POSTPAID.

HYBRID TOMATOES

636—BERRY'S HYBRID A.A.I—F₁. Extra large, bright red, very early and delicious. Ripens about 55 days from transplanting. One plant produces an unbelievably large amount of tomatoes. Trial packet 50c.

644—STOKES CROSS No. 4—HYBRID F₂. Vigorous enormously productive plants. Fine flavored bright red firm fruit. Trial packet 25c; 1 oz. \$3.50. POSTPAID.

TANGY
DELICIOUS

RHUBARB

BIG, HEALTHY
ROOTS

6861—GIANT VICTORIA. A dandy old favorite variety for many years. Larger stalks than ordinary varieties. Healthy, vigorous, 5/8 in. whole roots. Plant 3 ft. apart in spring or fall. Hardy everywhere. 5 for 98c; 10 for \$1.75; 25 for \$3.85 POSTPAID.

6864—CANADA RED. Thick large, completely red stalks Newest and best flavored. 3 ft. tall. Tender stalks good all summer. Makes delicious sauce. Each \$1.05; 5 for \$4.65; 10 for \$8.90.

VICTORIA QUICK CROP RHUBARB—No. 6865. Jumbo type roots that will produce crops quicker. Victoria variety. 5 for \$1.45; 10 for \$2.50; 25 for \$5.65 POSTPAID.

BERRY'S PEAS

455—EARLY ALASKA. (54 days.) The earliest and most popular of the smooth seeded varieties. Very sweet flavor, extremely hardy and wilt-resistant. Vines 23-26 inches tall with 2½ to 3 inch pods containing 5 to 7 peas each. A very uniform high yielding strain.

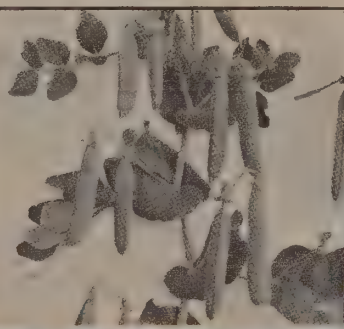

458—FREEZONIAN. (62 days). All-America Winner. Dark green, plump pods 3½ to 4 inches long on 24 inch vines. A favorite for freezing because the skin does not easily peel from the peas. A wilt-resistant very productive variety.

463—LITTLE MARVEL. (62 days). Our favorite for all uses. Table fresh, canning or freezing. Short 18 inch bushy vines that produce big yields of 3 inch pods tightly packed with 7 or 8 large dark green peas in each pod. Excellent sweet flavor and a very dependable variety that will produce over a long period of time.

pendable variety that will produce over a long period of time.

464—HUNDREDFOLD. (63 days). An excellent old stand-by that is still very popular. Sturdy dark heavy 20 inch vines with 4 inch pods containing 7 to 8 good sized peas each. An excellent wrinkled variety that is highly recommended for canning or eating fresh from the garden. Not as good a freezer as Little Marvel or Freezonian.

467—NEW FROSTY. (63 days). A very new highly recommended variety, exceptional for both yield and quality. It is wilt-resistant, 26 inch vines with 3½ inch dark green blunt doubled pods. The peas are wrinkled and generally set 6 to 8 per pod. The picture at right shows how the pods are set in pairs which is characteristic of this variety. Be sure to try this one. **NEW.**

POSTPAID PRICES: Gardeners Packet 30c; ½ lb. 65c; 1 lb. \$1.10.

CULTURAL RECOMMENDATIONS

Most varieties of peas should be planted just as soon as the ground can be worked in the spring. Wrinkled varieties can be planted just a little bit later than the smooth varieties. Plant in rows 2½ to 3 feet apart scattering the peas about an inch apart. They should not be covered over 2 inches deep.

Peas do not require a great deal of space and you will be able to enjoy them often from just two or three small rows. There is no more delicious vegetable than fresh garden peas. Berry's Gardener's Packet plants 20 ft.; 1 lb. plants a 120 ft. row.

MAIN CROP VARIETIES

468—PREMIUM GEM. (65 days). Another old variety that is still quite popular throughout the middle-west. It is a heavy yielding variety with unusually long pods and excellent flavor. Recommended for all-around use. Vines grow 28 to 30 inches tall.

470—ALDERMAN. (74 days). A tall vining variety that will grow 4 to 6 feet and should have vining support. Long 4½ to 5 inch pods with 8 to 10 large excellent flavored peas. Recommended for cooler areas and widely used for canning or freezing.

471—SHOSHONE. (69 days). Vining type bushes 30 inches high with 3½ inch blunt single pods, with 8-9 peas per pod. A popular wrinkled variety of exceptional yielding ability. They ripen very uniformly and can be used for freezing, canning or serving fresh from the garden. Sturdy, vigorous vines that stand up well. **NEW.**

472—CALIFORNIA BLACK EYE. Old fashioned southern type. Pick them young and tender or cure and dry for winter use. Very easy to grow and should be planted two weeks later than other varieties.

473—DWARF GREY SUGAR. (63 days). The earliest of the sugar varieties. Edible pods that can be cooked and eaten like snap beans. The succulent tender pods should be picked before the peas develop or they can be used as regular peas if you desire simply by letting the peas mature as the regular varieties.

PRICES ALL PEAS (EXCEPT FROSTY) Gardener's Packet 20c; ½ lb. 40c; 1 lb. 70c; 3 lbs. \$1.95; 5 lbs. \$2.75 POSTPAID.

300—BERRY'S ALL-SEASON PEA COLLECTION

Garden fresh peas including the earliest, mid-season and main crop varieties. ½ lb. each of Early Alaska, Little Marvel and Freezonian. \$1.20 value for only 98c POSTPAID. Save 20%.

TENDERGOLD

HYBRID SWEET CORN

Here at Berry's we have selected only proven top quality varieties of Sweet Corn that we know will produce well filled excellent flavored ears. We suggest planting several different kinds so that you can enjoy Sweet Corn from Early July until frost.

Plant in rows spacing the seeds about 4 to 6 inches apart with rows at least 2½ ft. apart. Stands should be thinned on the early varieties to about 12 inches apart and the full season varieties about 16 to 18 inches. Plant 3 or more rows at a time if possible in order to get full pollination to insure you of larger well filled ears. Sweet corn is at its best when it is picked and prepared as soon as possible. If it is necessary to store fresh corn for any length of time remove the husks as soon as possible and store in a cool place until ready to use.

264X—IOCHIEF. (90 days). A wonderful all-purpose drought resistant variety. Stalks 7 to 7½ ft. with well filled, deep kernel ears 8½ to 9 inches long. 14 to 16 rows of tender golden corn in each ear. A favorite main crop variety.

265X—SPANCROSS. (69 days.) Best early yellow hybrid. 6-7 inch ears with 12 rows of tender uniform kernels. Stalks 4½ to 5 ft. high. Wilt-resistant and also has good resistance to cold spring weather.

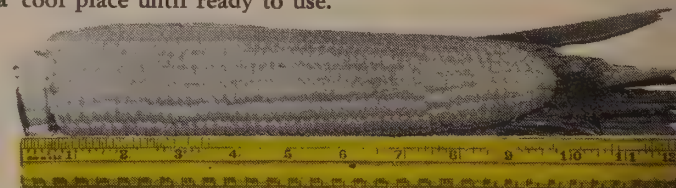

266X—MARCROSS. (74 days). An excellent early variety for both garden and market. Produces 7 to 7½ inch ears with 10 to 14 rows of large yellow kernels. Excellent flavor and a prolific producer. Resistant to bacterial wilt. Highly recommended for freezing, canning or fresh corn on the cob.

267X—IOANA. (89 days). High yielding, full-season hybrid producing long 8½ to 9 inch ears. Very uniform type, with 12 to 14 rows of medium width, light yellow kernels. Wonderful sweet corn flavor and excellent for all purposes. Highly recommended for the market gardener. Developed and released at Iowa State University.

263X—TENDERGOLD. (76 days). Produces ears 7 to 8 inches long with 12 to 14 rows of golden kernels of medium width and depth. A good producing popular variety throughout the middlewest. Sweet tender and fine quality. Good for both freezing or canning.

PRICES OF HYBRIDS. Berry's Gardener's Packet (plants 2-25 ft. rows) 20c; ½ lb. 45c; 1 lb. 80c; 3 lbs. \$1.80; 5 lbs. \$2.75 POSTPAID.

BERRY'S ALL SEASON "CORN ON THE COB" COLLECTION. ½ lb. Early July; ½ lb. Golden Cross Bantam; ½ lb. Iochief. All 3 varieties only \$1.19 POSTPAID.

268X—EARLY JULY. (63 days). Very early, excellent flavored type. 4-5 inch ears with 8 rows of light yellow well placed kernels. Stalks are small 3-4 ft. tall.

274X—COUNTRY GENTLEMAN. (90 days). Very sweet flavored deep white kernels on ears 7½ to 8 inches long. A heavy yielding favorite for many years. Popularly known as shoe-peg corn. Kernels in rows both irregularly placed.

OPEN-POLLINATED VARIETIES

287—STOWELL'S EVERGREEN. (90 days). A popular old-time favorite with large well filled ears. Deep kernels are very sweet, delicious flavor.

284—COUNTRY GENTLEMAN. (90 days). Similar in appearance to the Country Gentleman Hybrid described above. An old-time favorite still in big demand. Strong stalks 7 ft. high with exceptionally large ears. **PRICES OPEN POLLINATED CORN:** Gardener's Packet 20c; ½ lb. 40c; 1 lb. 70c; 3 lbs. \$1.75; 5 lbs. \$2.50 POSTPAID.

GARDENING IS FUN WITH BERRY'S FRESH DEPENDABLE SEEDS

BERRY'S GUARANTEE

We positively guarantee our garden and flower seed to grow. We will replace, without cost, any garden or flower seed that does not grow because of faulty germination. We assume no responsibility for crops or for any seed. For best results, carefully follow planting instructions on each package.

GREENPOD BUSH BEANS HEAVY YIELDING

Suggested Culture—Beans should not be planted until the soil is warm and seed should be inoculated with garden nitrogen to insure vigorous growth. Plant seeds 2 inches apart, 2 inches deep, in rows 2-2½ ft. apart. Make successive plantings every 3 weeks for fresh beans right up until frost. Maturity dates are based upon the time the seed is planted until the crop is ready for use. These dates are average and will be affected by weather and soil conditions. Berry's Gardener's packet plants a 30 ft. row; 1 lb. plants 120 ft. row.

103—CONTENDER. (52 days). Fine flavored, tender U. S. D. A. introduction. Fiber free, 6-7 in. round pods curved at tips. Very good yielder. Plants 15-18 inches tall. Vigorous and erect plants.

105—TOP CROP. (50 days). Excellent type, All America selection. Very early with concentrated yields over a short period. Best general variety for market, canning or FREEZING. 5-6 inch, very tender pods. Plants 18-21 inches high. Sturdy and upright. Resistant to common bean mosaic.

116—TENDERGREEN. (53 days). Big yielder of delicious, round dark green pods, 6-7 inches long. Excellent canning type. Mosaic-resistant. Dependable vigorous grower. Plants 18-20 inches high.

118—DWARF HORTICULTURAL. (57 days). A dependable old variety equally delicious as a green bean or shelled and dried. Thick flat pods are 5-6 inches long. Plants 14-18 inches high. Pods change color at maturity to a tan marked with carmine.

119—TENDERLONG. (48 days). Superb flavor, uniform smooth pods 6-7 inches long. Excellent variety for the home garden. Very early. Plants 17-19 inches high. Good freezer, too.

120—WADE. (57 days). All America selection. Dark green smooth pods 5½-6 inches long. Very good yielder. Strong erect plants 15-17 inches high. Disease resistant.

134—BURPEES STRINGLESS. (50 days). Dependable, popular variety for the home gardener. Long round green pods, tender and excellent flavor. Very productive and early. Plants 17-21 inches high.

PRICES ABOVE VARIETIES: Gardener's Packet 20c; ½ lb. 45c; 1 lb. 75c; 3 lbs. \$2.10; 5 lbs. \$3.00 POSTPAID.

GI—GARDEN INOCULANT. For bigger yields, increased seedling vigor, and faster growth. Use on both BEANS and PEAS. One package inoculates 5 lbs. Only 25c POSTPAID.

POLE BEANS

Later than green snap varieties but excellent as snap green or dried shell beans. Pole beans do best if given support such as fences, poles, or trellises. Plant in hills or rows. Berry's gardeners packet plants 20 hills or 25 ft. row; 1 lb. 120 hills or 300 ft. row. In rows plant 3-6 inches apart.

140—KENTUCKY WONDER. (65 days). Popular dependable variety. Bears over a long period. Distinctive flavor and excellent quality. Hardy, widely adapted, and a vigorous climber.

141 WHITE KENTUCKY WONDER. (63 days). Excellent for both dry shell or snap beans. A leading market variety. Long, flat oval pods. Not as vigorous a climber as the brown variety but a big yielder.

142—KENTUCKY WONDER WAX. (68 days). Vigorous climber that bears until frost. Equally good for snap beans when young or green shell beans later. Flat oval pods 7-7½ inches long. Nice light yellow color.

143—MISSOURI WONDER. (68 days). Creased back pods, extra large and well filled. Enormous yielder for green or dry shell beans and fine for snap beans, too. Vigorous plants climb to 6 ft. high.

144—WHITE HALF RUNNER. (60 days). Plants are bushy at base and grow 3-4 ft. high. Small pods are extremely tender. Very popular in south for its distinctive bean flavor.

PRICES POLE BEANS: Berry's Gardener's Packet 20c; ½ lb. 40c; 1 lb. 70c; 3 lbs. \$1.85; 5 lbs. \$2.75 POSTPAID.

STRINGLESS YELLOW POD BUSH BEANS

Berry's selected varieties listed below are all fine flavored and equally good fresh, canned or frozen. All are tender and "Stringless." Gardener packet plants 30 ft. row, 1 lb. plants 120 ft. row.

126—BRITTLE WAX. (55 days). Highly recommended for freezing. Plants 15-18 inches high. Bright yellow oval pods are 6-6½ inches long. Fleshy, stringless, wonderful flavor.

127—PENCIL POD BLACK WAX. (56 days). For home freezing, canning and market garden. Round fleshy pods of excellent quality, 6-7 inches long. Strong bushy plants 16-18 inches high.

128—TOP NOTCH GOLDEN WAX. (51 days). Early improved strain, fine producer of cream yellow, thick flat pods 5½-6 inches long. Hardy vigorous plants are 15-18 inches high.

PRICES ABOVE VARIETIES: Your choice Gardener's Packet 20c; ½ lb. 40c; 1 lb. 70c; 3 lbs. \$1.85; 5 lbs. \$2.95 POSTPAID.

BERRY'S BEAN GARDEN

½ lb. Burpee's Stringless
½ lb. Pencil Pod Wax
½ lb. Fordhook Lima

A \$1.25 value only 98c
POSTPAID.

BERRY'S CANNERS COLLECTION

1 lb. Burpee's Stringless
1 lb. Golden Wax
1 lb. Bountiful

A \$2.25 value only \$1.79
POSTPAID.

BUSH LIMA BEANS

Lima beans yield best on heavy type soil. Plant 1 inch deep in rows 3 ft. apart thin to at least 7 in. apart to give plants ample room to develop. Pole varieties should be planted in hills 3 ft. apart. Do not plant until danger of frost is past.

137—HENDERSON GREEN SEEDED. (68 days). Wonderful for freezing and canning. Small plump beans of superb flavor. Glossy green plants are 15-16 inches high.

138—FORDHOOK 242. (74 days). More tolerant to heat and drought than regular Fordhook. Vigorous plants bear from early in the season through the hottest weather until frost.

139—BURPEE'S BUSH LIMA. (74 days). Large podded and more productive than most with 4-5 large beans per pod. Sturdy erect plants 18-20 inches tall. Pods produced in clusters of 5-6. Delicious fresh or frozen.

140—FLORIDA BUTTER. (84 days). A prolific and continuous producer. Vigorous plants 8-10 ft. tall. Dark green pods have 3 to 4 beans each. Used for green or dry shell beans.

PRICES LIMA BEANS: Gardener's Packet (plants 30 ft. row) 20c; ½ lb. 40c; 1 lb. 70c; 3 lbs. \$1.85; 5 lbs. \$2.75 POSTPAID.

DRY SHELL BEANS

147—GREAT NORTHERN. (90 days). Dependable hardy variety. Long flat oval seed considerably larger than regular navy type. Plants 11-15 inches high with short runners.

148—MICHIGAN NAVY. (93 days). High yielding disease resistant type. Sturdy plants 16-20 inches high carry beans well off the ground. Small round oval beans excellent for baking.

149—RED KIDNEY. (97 days). Large, rich flavored, kidney shaped beans. Very popular for baking, soups or Mexican dishes. Plants 20-22 inches high, are bushy and vigorous.

PRICES DRY SHELL BEANS: Gardener's Packet 20c; ½ lb. 40c; 1 lb. 65c; 3 lbs. \$1.65; 5 lbs. \$2.75 POSTPAID.

BEETS

PLANTING RECOMMENDATIONS: 1 oz. sows 90 ft. Rows should be planted 24 in. apart. Seed should not be covered over 1 in. deep. When plants are 2 to 3 in. tall they should be thinned to 4 in. apart. Beets can be planted very early with new plantings every 2 or 3 weeks until the first of August.

156—Ruby Queen. 1958 All America winner. Uniform, round, medium sized extra delicious. Best new variety. Pkt. 15c; 1 oz. 45c; ¼ lb. \$1.25 POSTPAID.

164—Baby Canning. (54 days). Tender sweet perfect size for pickling. Pkt. 15c; 1 oz. 35c; ¼ lb. 90c POSTPAID.

155—Crosby's. (53 days). Deep red, perfectly shaped and uniform size. Excellent for bunching, canning or pickling. Very early. Pkt. 15c; 1 oz. 35c; ¼ lb. 90c POSTPAID.

154—Early Blood Turnip. (55 days). Large semi-flat uniform size. Good flavor, smooth skin. A splendid keeper. Pkt. 15c; 1 oz. 40c; ¼ lb. \$1.00 POSTPAID.

158—Swiss Chard. (55 days). Large light green leaves grow continuously throughout the summer. Deliciously flavored when cooked for greens. The more you use the heavier the plants produce. Pkt. 15c; 1 oz. 30c; ¼ lb. 75c POSTPAID.

CARROTS

1 oz. of seed sows 100 ft. Cover ½ in. in well prepared soil. Rows should be 2 ft. apart. When plants are up about 2 in. they should be thinned down to 3 in. apart. Easy to grow.

210—Gold Pak. (75 days). An excellent new all America winner. Long, tender and smooth. Fine grade sweet flavored. Pkt. 20c; ½ oz. 40c; 1 oz. 75c POSTPAID.

201—Oxheart. (75 days). Short extra thick. Deliciously flavored. Best variety for heavy soil. Easily pulled. Pkt. 15c; ½ oz. 25c; 1 oz. 45c POSTPAID.

204—Danvers Half-Long. (72 days). A favorite with home gardeners and commercial growers. An excellent keeper. Crisp tender sweet flavored flesh. Pkt. 15c; ½ oz. 30c; 1 oz. 50c POSTPAID.

205—Chantenay. (68 days) An excellent early fine flavored type. Coreless and tender. Pkt. 15c; ½ oz. 25c; 1 oz. 40c POSTPAID.

216—Tendersweet. (70 days). Very sweet, medium early. Large well shaped roots 7-8 in. long. Pkt. 15c; ½ oz. 30c; 1 oz. 50c POSTPAID.

212—Nantes Coreless. (72 days). Very crisp and tender. One of the best all around varieties. Excellent keeper. Pkt. 15c; ½ oz. 35c; 1 oz. 60c POSTPAID.

PEPPERS

Plant seeds inside or out about two weeks ahead of the time you would expect to set out plants. Peppers need plenty of room and plants should be no closer than 2 ft. apart.

518—California Wonder. Large, tender, thick meaty. Very mild, sweet flavor. Pkt. 15c; ½ oz. 65c; 1 oz. \$1.00 POSTPAID.

515—Ruby King. (68 days). A popular large sweet early pepper. Three lobed, thick fleshed, slightly tapered. Pkt. 15c; ½ oz. 40c; 1 oz. 70c POSTPAID.

512—Cayenne. (70 days). Long tapering deep green shading to brilliant red. A favorite hot variety. Pkt. 15c; ½ oz. 40c; 1 oz. 75c POSTPAID.

517—Pimento. (77 days). Heart shaped, smooth fruits. Dark green color changing to crimson. Thick sweet flavored flesh. Pkt. 15c; ½ oz. 40c; 1 oz. 80c POSTPAID.

BE THRIFTY—KEEP HEALTHY

PLAN YOUR VEGETABLE GARDEN NOW

LETTUCE

1 packet sows 50 ft. 1 oz. 150 ft. Order two or three different varieties for several plantings which will keep you supplied with fresh tender lettuce for several weeks. Head lettuce should be started inside and transplanted about 12 in. apart early in spring.

341—Ruby Lettuce. (45 days). Awarded All America honors. The glossy, dark red color will make any salad look more appetizing. Crisp tender leaves make an excellent garnish. Pkt. 20c; ½ oz. 40c; 1 oz. 75c POSTPAID.

329—Prizehead. (40 days). Reddish Bronze tender leaves. Remains crisp and tender longer than most others. Pkt. 15c; 1 oz. 35c POSTPAID.

526—Black Seeded Simpson. (45 days). Favorite early spring lettuce. Large, crinkled tender leaves. Pkt. 15c; 1 oz. 35c POSTPAID.

327—Early Curled Simpson. (45 days). Light green color. Pkt. 15c; 1 oz. 40c POSTPAID.

323—Bibb (Limestone 55 days). Chef's and gourmet's favorite. Distinctive tender flavor. Leaves smooth, dark green. It will be your favorite once you try it. Pkt. 20c; ½ oz. 35c POSTPAID.

324—Salad Bowl. Another All American selection. Loose leaf, rich green. Delicious flavor. Pkt. 20c; ½ oz. 35c POSTPAID.

330—Chicken Lettuce. (48 days). Early tall growing heavy yielding. Vitamin filled green feed for poultry. Pkt. 15c; 1 oz. 30c; ¼ lb. 70c POSTPAID.

RADISHES

1 packet plants 50 ft. 1 oz. sows 100 ft. Seed should be planted very early with new plantings every 2 weeks apart so that you may enjoy fresh tender radishes for many weeks. Rows should be at least 1 ft. apart.

531—Champion. (27 days). 1957 All America winner. Bright red outside with crisp tender white flesh. Pkt. 20c; 1 oz. 40c POSTPAID.

LAWN GRASSES AND SUPPLIES

A well kept vigorous growing lawn not only enhances the appearance of your home but increases the value as well. Careful selection of lawn seed is one of the most important considerations whether planning a new seeding or renovating an old lawn. Sow lawn grass seed just as early as the ground can be thoroughly worked even though the frost has not left. This helps in getting the lawn well established before hot dry weather and before there is too much competition from weeds that are present in all soils.

Well worked seed beds are necessary for best results. Sow at least one pound seed for each 200 sq. ft. Divide the seed in two parts then sow half one way and the remaining half the other direction. Rake or roll the soil carefully after seeding. Ask for our special bulletin on lawn care.

BERRY'S SUPREME LAWN MIX

Our finest lawn grass mixture. Contains about 60% Kentucky Blue Grass, 20% Bent Grass and 20% Perennial Rye Grass. Treated with our special Gro-Coat Brand formula to insure quick germination and sturdy vigorous growth. Grows well in any soil, in sun or part shade. One pound will sow up to 300 square feet. Enjoy a lawn that will stay green all year even in the hottest part of summer. Prices: 1 lb. 90c; 3 lbs. \$2.50; 5 lbs. \$3.65 POSTPAID.

BERRY'S ALL GREEN MIXTURE

Don't compare Berry's All Green Mixture with other inexpensive blends, because we use only top grade seed in every respect. This quick growing mixture should be seeded 1 lb. to 200 sq. ft. It contains primarily Domestic and Perennial Rye Grass, smaller amounts of Kentucky Blue Grass and Fescue. Should start to germinate under favorable conditions in 5 or 6 days and is guaranteed to grow if planted according to directions and if proper care is given. A fine mixture for sowing later in the season then following in the fall with a straight seeding of Kentucky Bluegrass. Prices: 1 lb. 50c; 3 lbs. \$1.35; 5 lbs. \$2.15 POSTPAID.

SURE GROW LAWN MIXTURE

A well balanced mixture adapted to practically any soil types and hardy in any area. We recommend it for areas which may have heavy traffic, such as playgrounds or backyards. Contains Kentucky Bluegrass, Tall Fescue, Rye Grass and Creeping Red Fescue, all of highest purity and germination. Very economical to sow and 1 lb. should be used on about 250 sq. ft. All of our lawn grass is protected by our special Gro-Coat formulation which keeps the seed from rotting in the ground and assures you of more vigorous healthy stands. PRICES: 1 lb. 60c; 3 lbs. \$1.65; 5 lbs. \$2.50; 25 lbs. \$11.25 POSTPAID.

BENT GRASS

Bent grasses make luxuriant, smooth lawns—the same kind you expect to find on well kept golf greens. We offer only the Highland type bent as we consider it better adapted because of the excellent turf forming characteristics. Where time and funds for maintenance are limited we recommend using our supreme lawn mixture as bent grass requires daily care. Highland Bent has an unusual blue-green hue and holds its color during the winter months better than other strains. POSTPAID PRICES: 1 lb. 75c; 3 lbs. \$1.95; 5 lbs. \$3.00; 10 lbs. \$5.50.

MEYER Z-52 ZOYSIA

A new strain of Zoysia that requires only occasional mowing. Tough, wear-resistant, and provides an extremely thick, cushiony turf that has a tendency to choke out weeds and crab grass. It does not require extensive fertilizing and thrives under nearly all conditions. Some prefer to establish a Zoysia lawn from plugs or stolons but we believe that seeding is much cheaper as a pound will sow around 400 sq. ft. Seeding instructions are provided with each order. POSTPAID PRICES: 1 lb. \$3.75; 3 lbs. \$10.75; 5 lbs. \$17.50.

ROTO-EDGER

Reaches edges and areas lawn-mowers can't touch. Eliminates bending, stooping or kneeling and makes grass trimming an easy, pleasant garden activity. Maintains factory-sharp cutting edge and gives years of trouble-free service. Guaranteed workmanship and material for a full year. 48 in. carefully finished hardwood handle. Rubber tires for traction. Adjustable shear blade.

MODEL RO20.....Each \$5.95

Page 38

CREeping RED FESCUE

A fine round bladed grass that thrives in all types of soil. The best lawn grass for shady areas. Is very hardy and maintains its color the year around. When used straight sow 1 lb. to 150 sq. ft. or in lawn mixtures about 1/2 Creeping Red Fescue to 2/3 Bluegrass and Rye Grass. POSTPAID PRICES: 1 lb. 75c; 3 lbs. \$2.10; 5 lbs. \$3.25.

CHEWINGS FESCUE

Does well on any kind of soil. Good for areas such as playgrounds and athletic fields. Grows in either sun or shade. Should not be cut less than one or one-half inches high. Sow one pound to 200 square feet. PRICE POSTPAID: 1 lb. 75c; 3 lbs. \$2.10; 5 lbs. \$3.25.

WHITE CLOVER

Commonly known as White Dutch. Very popular for lawns. Growth starts early in spring and stays green after mowing. Grows in all types of soil. Is drought resistant and helps soil fertility. A pound sows 1000 or more square feet. POSTPAID PRICE: 1 lb. \$1.65; 3 lbs. \$4.50; 5 lbs. \$6.95.

Gilmore Hosemaster Nozzle

The World's best hose nozzle. Automatic spray control saves water. Easy to use and adjust. Exclusive pistol grip control. Leak proof and clog proof. Non-corrosive, lifetime metallic finish. POSTPAID PRICE: \$1.50 each.

FERTILIZER-INSECTICIDE SPRAYER

Makes up to 100 gallons of spray. No pre-mixing necessary. Use any type of spray desired with perfect automatic mixture of water and liquid chemicals. Accurate adjustable metering system. Unbreakable pint sized container. POSTPAID PRICE: \$5.95

KENTUCKY BLUE GRASS

The basic grass of all good lawns and lawn grass seedings. One of the finest all-purpose grasses as well. We harvest and process our own Bluegrass from carefully inspected weed free fields. Can be sown in spring or fall and for new seedings we recommend 5 lbs. to 1000 square feet. With proper care and fertilization will supply a dark green thick heavy lawn.

Heavy, refined. 1 lb. \$1.10; 3 lbs. \$3.00; 5 lbs. \$4.50; 10 lbs. \$8.00 POSTPAID. Extra Heavy, Faster Growing. 1 lb. \$1.35; 3 lbs. \$3.75; 5 lbs. \$6.00 POSTPAID.

PARK BLUE GRASS

An extremely hardy new variety developed in Minnesota. 1 lb. will sow about 300 sq. ft. Germinates in 8 to 12 days. Disease resistant and easy to grow. Faster growing and goes farther than regular. 1 lb. \$1.25; 3 lbs. \$3.60; 5 lbs. \$5.75; 10 lbs. \$10.50 POSTPAID.

MERION BLUE GRASS

A new blue grass with deep heavy roots permitting it to stay green longer during hot weather when other varieties 'burn out.' Darker green color and spreads faster in new seedings. Easy to maintain and requires less frequent cutting. Heavy cushioned turf crowds out weeds. One pound sows 400 sq. ft. Price: 1 lb. \$1.65; 3 lbs. \$4.80; 5 lbs. \$7.75; 10 lbs. \$15.00 POSTPAID.

ACME CRABGRASS CONTROL

The newest and most popular of all Crabgrass killers. Pint covers 1600 sq. feet. Spray and sprayer all in one. Just attach to hose and spray. Gives excellent control in Blue grass, Merion Bluegrass or Zoysia. Easy to use and effective. POSTPAID PRICES. 1 pt. (with hose nozzle) \$2.35; Quart (refill) \$3.50.

DIELDRIN GRANULES

Easy to use, effective control of beetle, grubs, ants, crickets, army worms, webworms and wireworms. Sprinkle on lawn or flower bed then work into lawns or soil. Water for effective control. Easy and safe to use. Gives long lasting control of most lawn insects. Prices: 15 oz. Canister \$1.19; 3 lb. Canister \$2.69 POSTPAID.

CHLORDANE DUST

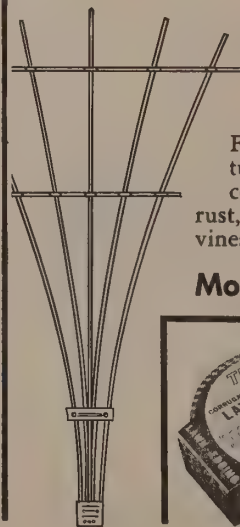

A multi-purpose insecticide containing 10% Chlordane. Kills by contact. For control of Japanese beetle, grubs, ants, lawn moss, cutworms, chiggers and many other pests. Use as dust or soluble spray. Dust around foundation to prevent insects from entering homes. Prices. 1 lb. Canister 69c each; 5 lb. bag \$1.98 POSTPAID.

Aluminum Fan Trellis

SIZE: 54" High — 33" Wide

Five element, fan type trellis of heavy 3/8 in. tubular aluminum construction. Mounts onto center element easily with two U-bolts. No rust, no rot, no painting. Easily supports heaviest vines and climbing roses.

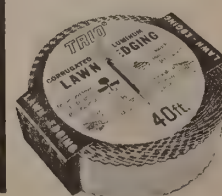

Model 54A5—Ea. \$2.95 POSTPAID

CORRUGATED

Aluminum Edging

Lightweight, deeply corrugated aluminum with double rolled safety edge. Use around trees or shrubs; for driveway or walk borders; or for popular planting tiers. 40 ft. roll—4 in. wide. TR404—\$3.95 per roll, POSTPAID.

HYBRID PETUNIAS

For Bedding -- For Borders

The dazzling new colors and improved flowering habits of the F¹ Hybrids have made Petunias the most popular and widely grown of all the annual flowers. They thrive in full sun and hot weather; are very easy to grow and will bloom continuously all summer long until the first killing frost. Petunias are unsurpassed for colorful borders, bedding or mass planting. Seeds may be started inside in Feb. or March (Jiffy planters, Page 26, are excellent) and we supply full instructions with each order.

PE140--SATIN SERIES.

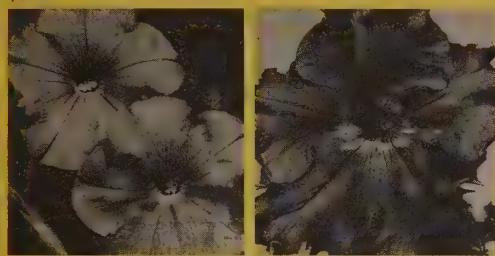

New F¹ Hybrids including the 1961 All-America selection, Coral Satin. All are outstanding in their dwarf, compact growth habits and profuse blooms, 2" across. Your choice of these colors: CORAL, PEACH, PINK OR RED STAIN. 150 or more seeds in each packet. Pkt. \$50c; 3 Pkts. \$1.29.

PE141--HYBRID BLUE RIBBON.

Top-notch multiflora hybrid. Bears large numbers of deep-violet blue flowers. Compact plants. At last a dependable pure blue. Pkt. 50c; 3 Pkts. \$1.29.

PE142--GLITTERS PETUNIA.

Hybrid bi-color, bright scarlet red with contrasting white stripes. 8"-9" compact plants. Pkt. 50c; 3 Pkts. \$1.29.

PE143--LUSTRE PETUNIA SERIES.

Outstanding new hybrids with large, wavy-petaled flowers on compact 12" plants. 150 or more seeds per packet. Your choice of 4 new colors:

BLUE LUSTRE. Deep Mid-blue.
SCARLET LUSTRE. Vivid, dazzling scarlet.
SALMON LUSTRE. Rich pink-salmon.
ROSE LUSTRE. Strong rose-pink.

Pkt. 50c; 3 Pkts. \$1.29.

PE-149--Canadian All Dougle Petunia.

Amazing new hybrid. Tremendous double blooms with widest color range yet. Mixed reds, scarlets, pinks, whites and blues. Pkt. 50c; 3 Pkts. \$1.29.

PE144--FIRE CHIEF PETUNIA.

Popular brilliant red. Very free flowering. Pkt. 25c; 3 Pkts. 59c.

PE145--CONFETTI PETUNIA.

Hybrid F₂, compact plants with gay bright flowers in reds, purples, pinks and whites. Pkt. 25c; 3 Pkts. 59c.

PE146--VIOLEACEA PETUNIA.

Deep violet-purple. Large flowered, velvety texture. Pkt. 15c; 3 Pkts. 59c.

PE147--LIPSTICK PETUNIA.

Carmine, rose shaded salmon. Pkt. 25c; 3 Pkts. 59c.

PE148--WHITE KING PETUNIA.

Velvety white, large flowered. Pkt. 25c; 3 Pkts. 59c.

PH161--PHACELIA, CAMPANULARIA

(Calif. Blue Bells). Lovely gentian-blue, bell-shaped flowers borne in profusion on sprightly 8"-12" sturdy plants. Pkt. 15c; 3 Pkts. 39c.

PH164--PHLOX, Globe Mixed.

Compact 8" plants bearing many colors of white, pink, salmon, rose, red, violet and others. Full mounds of bloom. Long lasting. Pkt. 25c; 3 Pkts. 59c.

PH166--PHLOX, TWINKLES.

All American winner. Dwarf plants 6"-8" tall, covered with bright, glowing mounds of star-like flowers. Very easily grown. Pkt. 25c; 3 Pkts. 59c.

PO168--POPPY NUDICAULE

(Iceland poppy). Giant art shades. Special strain of excellent pastels with 3"-4" flowers on 14"-18" stems. Ivory, cream, primrose, peach, pink, buff-yellow, apricot and rose colors mixed. Pkt. 15c; 3 Pkts. 39c.

PO169--POPPY, Double Shirley.

Taller, free-branching plants, with mixed shades of pink, deep-red, salmon, white and picotees. Pkt. 15c; 3 Pkts. 39c.

PO170--PORTULACA DOUBLE

(Moss rose). Low growing, spreading type plant that thrives in extreme heat and drought. Covered with brilliant double, rose-like flowers that open when the sun shines. Mixed colors of pink, cream, red, gold, scarlet, cerise and striped. Pkt. 15c; 3 Pkts. 39c.

QU174--QUEEN ANNE'S LACE FLOWER.

Decorative fine foliage, with lacy white flowers. Excellent for mixed bouquets and arrangements. Pkt. 15c; 3 Pkts. 39c.

SA178--SALPIGLOSSIS

(Painted tongue). Fine cut flowers, with bold, rich colors of purple, red, rose and gold. Velvety textured petals. Trumpet shaped flowers 2½"-3" across bloom from mid-summer until frost. Plants 2-3 ft. tall. Pkt. 15c; 3 Pkts. 39c.

SA182--SALVIA, Blaze of Fire.

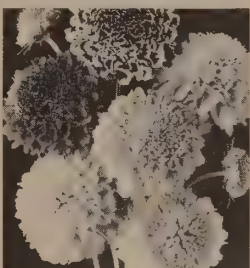

One of the best bedding and border types. Compact plants 14" high, with spikes of brilliant scarlet flowers, early blooming and last until frost. Very easy to grow and should be started indoors for the earliest blooms. Pkt. 25c; 3 Pkts. 59c.

SA183--SALVIA--St. John's Fire.

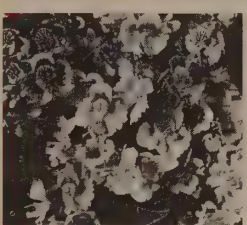

Dwarf upright plants 12" high, very early, with bright red spikes. Newest and best, for borders or beds. Pkt. 35c; 3 Pkts. 89c.

SB188--SCABIOSA, Imperial Giants.

Extremely large flowers, composed entirely of broad frilled petals, arranged in a perfect bill (no "pincushions"). Plants are 36"-48" tall, upright, wiry stemmed. Color range is from light salmon-rose to deep rich shades. A new improved variety. Pkt. 25c; 3 Pkts. 59c.

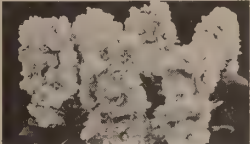

SC192--SCHIZANTHUS HYBRIDS.

(Butterfly Flower). Compact, conical plants 12" high. Beautiful, butterfly-like flowers all with distinct gold center contrasting with brighter and deeper colors of purple, pink, lavender and salmon, all in rich tones. Easy to raise. Pkt. 25c; 3 Pkts. 59c.

ST194--STOCKS, Dwarf Ten Week.

Delightfully fragrant, colorful columns of charming blooms in just 10 weeks from seed. Dwarf 12" plants, easy to raise, and excellent for bedding, cut flowers or borders. Mixed colors of pink, red, lilac, blue, white and yellow. Pkt. 25c; 3 Pkts. 59c.

VN197--VINCA, Little Pinkie.

New strain, dwarf growth habit with 12"-16" plants. Bright pink colored flowers. Stands heat and drought. Attractive foliage and lots of bloom. Pkt. 15c; 3 Pkts. 39c.

TT247--TITHONIA, (Mexican Sunflower)

Tall, vigorous plants with large bold foliage. Dazzling orange-red flowers start early in summer and continue until frost. Excellent along fences and for tall backgrounds. Pkt. 15c; 3 Pkts. 39c.

SWEET PEAS.

Everyone loves sweet peas. They are a perfect annual for almost any area — easy to grow in most soils with blooms over a long period of time. The flowers are softly fragrant and excellent for cutting.

SW211--Cuthbertson Floribunda Sweet Peas

Early blooming, and they continue if the flowers are frequently picked. Plenty of large, fragrant blooms with clear, clean colors. Mixed or single colors of white, pink, blue and lilac. Pkt. 15c; 1-oz. 40c.

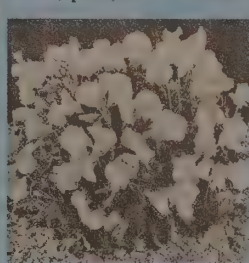

SW214--Little Sweet-Heart Sweet Peas.

Dwarf plants, only 8" high, but with full size flowers covering the bushy plants. A dandy edging or border strain. Mixed colors. Pkt. 25c; 1-oz. \$1.50.

SW217--UNWIN'S

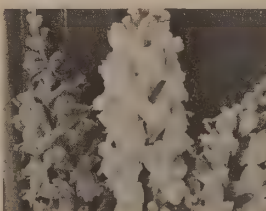

Striped Sweet Peas.

(Butterfly Hybrids). Gay and striking blend of striped colors in an amazing number of color combinations. Vigorous, plants with clusters of 3-4 large flowers on a single stem. Pkt. 25c; 1-oz. \$1.00.

SN240--SNAPDRAGON, Rocket Hybrids.

The first of these remarkable hybrids for outdoor planting. 1960 All-America selection. Early blooming with large well-filled spikes of large richly colored blooms. Seed should be started indoors in Feb. or March. Easy to follow instructions with each order. Pkt. 50c; 3 Pkts. \$1.29.

SN242--Snapdragon, F2 Hybrids.

Mardi Gras strain. Broad color range including excellent bronze and pink colors. Excellent for cut flowers and if picked regularly will produce blooms right up until frost. Extra long spikes. Pkt. 25c; 3 Pkts. 59c.

ASTERS.

One of the finest and most desirable annuals for cut flowers, bedding or borders. Seed should be started indoors in March and transplanted to permanent locations when weather is warm. We strongly recommend planting only WILT-RESISTANT varieties.

AS312--PRINCESS IMPROVED ASTER.

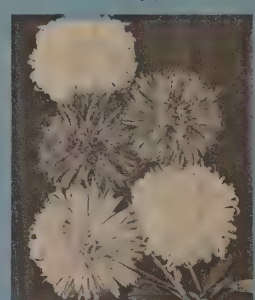

New compact, branching type, 20"-24" high, completely covered with 3" flowers when plants bloom in August. Long stemmed blooms keep for days when cut. Space plants 9" apart. Mixed colors of lavender, rose, white, scarlet and yellow. Pkt. 25c; 3 Pkts. 59c.

AS313--CREGO ASTER

Unchallenged favorite of American gardeners. Huge, double 4"-5" flowers with curled, feathery petals. Mixed colors in rich tones. Pkt. 25c; 3 Pkts. 59c.

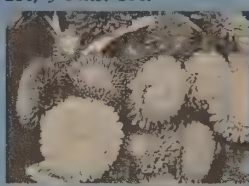

AS314--POWDER-PUFF ASTER.

Delightful, refined tightly double flowers literally covering the sturdy 2' plants. Mixed colors. Pkt. 25c; 3 Pkts. 59c.

AS317--AMERICAN BRANCHING ASTER.

Robust 2'-2½' free-branching plants with large double fine form flowers. Blooms in late August. Mixed colors. Popular favorite. Pkt. 25c; 3 Pkts. 59c.

CA1415--CARDINAL CLIMBER.

Large scarlet flowers on rapid growing vines, with attractive dark green foliage. Continuous blooms from early summer until fall. Easily grown. Pkt. 15c; 3 Pkts. 39c.

CH1416--HEARTS & HONEY VINE

Similar to Cardinal Climber but flowers change color from light pink to orange or rich rose during the day. Unusual, irregular shaped leaves. Fast growing. Pkt. 15c; 3 Pkts. 39c.

FO1240--FOUR O'CLOCK.

(Marvel of Peru). Popular, old-time favorite, easily grown. Full range of colors in these lovely rose-like flowers covering the main stock, blooming in late afternoon and closing the following morning. Pkt. 15c; 3 Pkts. 39c.

All Prices Postpaid on this Page

Start Your Own Perennials From Seed

P10—COLUMBINE, McKana's Hybrids.

Widely grown, popular perennial. New hybrid strain bears long spurred blooms. Mixed single and combined colors. Seed sown inside, in early spring will bloom the first season by early fall. Columbine likes partial shade and is entirely hardy for any area. Pkt. 25c; 3 Pkts. 59c.

P12—CANDYTUFT, White

New, dwarf type, growing about 6-8 inches tall in low mound form and blooming in early spring. Excellent for edging and borders. Flowers are in compact clusters of white only. Sow seed inside early in February and transplant to permanent locations as soon as weather permits. Pkt. 25c; 3 Pkts. 59c.

P14—DAISY—SHASTA.

Double Marconi. Immense, fully double white blooms 5 inches across. Plants 2½ ft. tall. Excellent new strain. Seed can be started inside in early February and transplanted or wait until warm weather and plant directly in the area where they are to grow. Pkt. 25c; 3 Pkts. 59c.

P16—SHASTA DAISY

SINGLE. Large 4-5 in. white single flowers with bright yellow centers. Very hardy. Thrive in full sun and in well drained areas. Pkt. 15c; 3 Pkts. 39c.

DELPHINIUM

PACIFIC GIANT HYBRIDS

A remarkable, new, mildew resistant strain with enormous spikes of huge flowers and very high percentage of double blooms. Excellent range of colors. Start inside in January or February and transplant as soon as weather is warm. Full planting instructions with each order. Available in several different outstanding series of colors.

P21—SUMMER SKIES.

Lovely light blue with white bee. Plant variations in color but all outstanding non-fading huge spikes of bloom. Pkt. 50c; 3 Pkts. \$1.29.

P22—Astolot Series.

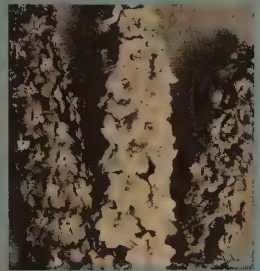

This color range includes several different shades of pink including rosy-lilac and raspberry rose, all with dark bees. Very attractive unusual type. Pkt. 50c; 3 Pkts. \$1.29.

P23—BLACK KNIGHT SERIES.

All very dark blues, immense blooms and some with dark bees. Pleasant contrast to lighter blues. Pkt. 50c; 3 Pkts. \$1.29.

P24—GALAHAD SERIES.

Huge clear white blooms of enormous size, unusually long spikes. Excellent for cut flowers and arrangements. Pkt. 50c; 3 Pkts. \$1.29.

P27—DIGITALIS—FOXGLOVE.

New Excelsior Hybrid strain with florets nearly horizontal, permitting better display of beautifully spotted throats. Colors include purple, rose, pink, white and light yellow. Digitalis is actually considered as a hardy biennial rather than perennial. Blooms in June and July. Seed should be started inside and transplanted in warm weather. Pkt. 25c; 3 Pkts. 59c.

P31—GEUM (Avens)

Color picture on page 43. Very easy to grow, lovely perennial flowers on 1½ ft. plants bearing beautiful rose type double flowers in a brilliant red color. Seed should be started indoors. Live plants also available. See page 43. Pkt. 25c; 3 Pkts. 59c.

P36—GAILLARDIA (Blanket Flower).

Reliable, hardy, 2-3 ft. perennials with bright bi-colored 3" blooms. Colors vary from maroon centers with outer yellow petals and brilliant reds. Live plants also available. See pages 12-13. Pkt. 25c; 3 Pkts. 59c.

P38—PENSTEMON.

Easy to grow in full sun, well drained soil. Best if started indoors and transplanted, but will bloom the first season if started early. Mixed colors of bell-shaped flowers bloom from early summer through August. Excellent long lasting cut flowers or for bedding. Pkt. 25c; 3 Pkts. 59c.

P40—PYRETHRUM, Painted Daisy.

Beautiful 3" flowers in shades of rose-pink salmon and carmine. Easy to grow in most soil types, but prefer full sun. Should be started inside for best results. For live plants see page 12. Pkts. 25c; 3 Pkts. 59c.

P43—RUDBECKIA, Gloriosa Daisy.

Giant new tetraploid strain. Flowers up to 6" across in varying shades of bronze, mahogany, and bright yellows with some bi-colors and doubles. Very easy to grow, hardy for most areas. Profuse blooms from July until frost. Seed started in February or March will bloom this year. Plants 1½'-2' tall. Pkt. 25c; 3 Pkts. 59c.

P47—GERBERA (Transvaal Daisy)

A superior strain of good vitality developed on the Pacific coast in both single and semi-double flowers with an excellent color range. Seed should be started inside and best if dusted with chlordane to prevent pre-emergence insect damage. Complete planting instructions with each order. Flowers, 5" across have long narrow petals on strong graceful stems. Pkt. (50 seeds) 50c; 3 Pkts. \$1.29.

P49—TRITOMA

(Red Hot Poker).

New Pfister's Hybrid. Very large, brilliant 4 ft. plants with giant spikes of scarlet orange-red tubular florets hanging closely together to form a "Red Hot Poker" effect. Very easy to grow and if started early should bloom the first year. Pkt. 25c; 3 Pkts. 59c.

PANSIES (King Size)

A brand-new outstanding mixture with enormous giant sized blooms. Colors include combinations of mahogany and bronze, mahogany and gold, mahogany and yellow, mahogany and red and a substantial amount of raspberry rose with combinations of violet and white and violet and cream. This new strain is, without a doubt, the biggest improvement in pansy development in the last decade. Start inside in spring or fall and transplant to permanent locations. Available in both live plants and seed. Plants shipped in plastic pots carefully packed in heavy corrugated containers. Plants 6 for \$1.49; 12 for \$2.59 POSTPAID. Seed Pkt. of 50 seeds or more 35c; 3 Pkts. 89c.

GERANIUMS.

Zonale Mixed. Delightful shades of rose, rose-pink, scarlet, salmon and picotee blooms. Seeds should be started inside for these charming house plants and they will germinate unevenly in from 2 to 6 weeks. Blooms in 8 weeks. Pkt. 35c; 3 Pkts. 79c.

MORNING GLORIES

MO-FLYING SAUCER.

Delightful new striped flowers in bright blue and white. Easy to grow with vigorous fast growing vines. Pkt. 25c; 3 for 59c.

MO-CANDY PINK.

A delightful shade of pure pink with enormous flowers borne in abundance on sturdy vigorous vines. Blooms from early summer until early frost. Pkt. 15c; 3 Pkts. 39c.

MO-SCARLET O'HARA.

An excellent fast growing brilliant wine-red flower. Pkt. 15c; 3 Pkts. 39c.

ZINNIAS

The most versatile of all the annual flowers. Wide variations in flower size and colors. Every type from the huge California giants down to the petite Lilliput Tom Thumb are easily grown even by the most inexperienced gardener. Excellent for cut flowers or bedding, they bloom from early summer right up until frost.

COLORFUL ORIENTAL POPPIES

The superb blooms of blazing scarlet apricot, mahogany, and lavender pinks dominate the spring garden with a mass of brilliant color. Plant them singly or in groups, in well-drained soil and full sun. When grouped plant 10-12 inches apart, early in **Spring or Fall**. **POSTPAID PRICES.**

MA2420—PHENOMENAL. Rich, pleasing pink. Early flowers are large sized with slightly ruffled petals. Ea. 90c; 3 for \$2.55.

MA2425—COLONEL BOWLES. Huge, orange-scarlet flowers in generous numbers, on long graceful 36 in. stems. A popular favorite in every garden. Ea. 90c; 3 for \$2.55.

MA2429—HENRY CAYEAU. A most unusual shade of dusty rose. Extra large flowers. If planted in slight shade will produce even larger more colorful blooms. Ea. 80c; 3 for \$2.19.

MA2431—CURTIS GIANT FLAME. Well named because of the giant brighter blooms. Very strong vigorous plants. Ea. 85c; 3 for \$2.39.

MA2432—POPPY COLLECTION

1 ea. above varieties.
All 4 for only **\$2.98 POSTPAID.**

PEONY FAVORITES

Breath-taking beauty for early summer blooming. Maximum blooms generally from middle of May to June 1st. Attractive foliage can be effectively used as a background for other flower arrangements. Berry's peony roots are all carefully selected, large healthy field grown. Plant about 3 feet apart in spring or fall. Like sun but will grow well in partly shaded areas.

Each **\$1.10**; 3 for **\$2.95 POSTPAID**

MA3320—PEONY GARDEN OF 3.

1 each above varieties.
ALL 3 for only **\$2.75 POSTPAID.**
Peonies Shipped Spring or Fall.

HARDY CREEPING FLOX

Early blooming gay colored flowers in April-May completely cover the creeping, moss-like foliage. Excellent for borders, rock gardens or as ground cover. Colors include blue, white, pinks and carmine. Very hardy, easy to grow, the plants should be placed about 8-12 inches apart in full sun. Shipped for **Spring or Fall** planting.

MA2367—PINK EMERALD. Brilliant pink.

MA2366—CRIMSON BEAUTY. Large flowered red.

MA2365—BLUE EMERALD. Lilac blue.

MA2368—EARLY SNOWFLAKE. Purewhite.

POSTPAID PRICES: 2 for 98c.

One each above colors.
All 4 for only **\$1.75 POSTPAID.**

GEUM—Mrs. Bradshaw (Avens)

These charming, easy-to-raise perennials are actually a member of the rose family. The large double flowers are a dazzling fiery-red and bloom from June through August. They are excellent for cutting and arrangements. Used in foreground borders or in groups they highlight your entire garden with their blazing color. Geum is very easy to grow on ordinary soil, but they do require frequent watering during hot, dry weather. Plant 6-8 inches apart. Live growing plants are shipped in plastic pots, securely packed in heavy corrugated cartons. Available also in seed which should be started indoors in January or February. Plants will be shipped after the danger of freezing is past for **Spring Planting Only.**

B2700—3 for \$1.49; 12 for \$4.98 POSTPAID.
Seed 1ge. pkt. only **35c POSTPAID.**

DAY LILLIES

(Hemerocallis)

Magnificent colorful blooms from May 15th on through September. Easy to grow and requires very little care. As many as 40 or 50 buds and flowers on one single main stem. Maximum height 3 feet. Hardy anywhere. Plant 12 to 18 in. apart. Shipped Spring or Fall.

MA2290—PAINTED LADY. 8-9 inch blooms of dark cinnamon over yellow with coral pink throat. Ea. **\$1.25**; 3 for **\$3.60.**

MA2273—SURPRISE PARTY. Lovely pale pink. Holds up well on hot dry days but should be planted in afternoon shade. Ea. **\$1.45**; 3 for **\$3.85.**

MA2296—HYPERION. Huge flowers of pale lemon-yellow. Very fragrant. Ruffled. Ea. **75c**; 3 for **\$2.10.**

MA2275—BLACK MAGIC. Picture is not true color. Actually it is a striking black-purple with pale throat. The best of the dark colors. Ea. **\$1.75**; 3 for **\$4.45.**

MA2270—PURPLE FINCH. A glowing reddish-purple with artistically curled petals. Yellow cup. Ea. **75c**; 3 for **\$2.10.**

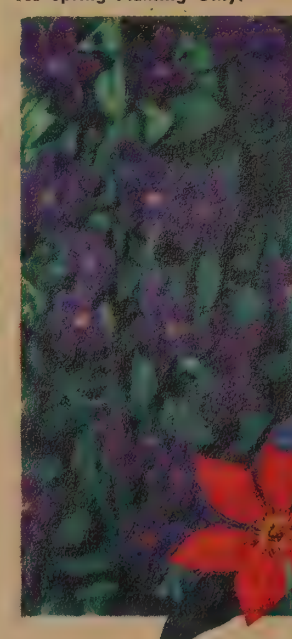

ALL PRICES POSTPAID.

MA2282—DAY LILY GARDEN

1 ea. above varieties.
All 5 for only **\$4.95 POSTPAID.**

LARGE FLOWERING CLEMATIS

Spectacular, colorful vines for the garden, trellis, wall or arbor. Rich, colorful blooms vary from deep purple, to light pinks and even whites. Very easy to grow but best in loose, rich soil. Blooms usually appear in early summer but some varieties bloom again in the fall. Shipped for **Spring Planting Only.**

MA2610. CLEMATIS JACKMANI. Most popular variety. Large velvety deep-purple flowers that create a solid mass of color.

MA2611. RAMONA. Beautiful, large-flowered, single pale blue.

MA2613. CRIMSON STAR. Immense, garnet-red flowers. Very colorful.

POSTPAID PRICES:

Each **\$1.60**;

3 for **\$4.50**

MA2615—COLLECTION OF 3 CLEMATIS.

1 Each above.
All 3 for only **\$4.25 POSTPAID.**

MA2623. MME DE BOUCHMARD. Free-blooming from July until Sept. Rich velvety lilac-pink flowers with artistically curved petals. Ea. **\$1.75**; 3 for **\$4.95 POSTPAID.**

NEW, LOW POSTPAID PRICES ON POTTED EVERGREENS

Our evergreens are grown in northern Wisconsin, the traditional home of fabulous evergreen forests, where light soil and cool weather combine to create the ideal conditions for starting vigorous, disease-free stock. Strong, sturdy root-systems are allowed to develop without crowding in generous sized individual containers. All of our young specimen trees are started and continue to grow until they reach our customers, in natural organic forest mulch. Our select stock will develop into more valuable and beautiful specimens with each succeeding year. All stock is shipped direct from our Wisconsin nursery to you, well packed and guaranteed to reach you in prime condition. All evergreens listed on this page are at least 4 years old, and twice transplanted.

INDIVIDUALLY PACKAGED CONTAINERS

Our new, improved method of individual packaging in individual containers assures you of receiving, healthy, fresh stock, ready for planting, and guaranteed to grow. The handling of evergreens, "balled and burlapped" has always been considered ideal for larger plants. This method has always presented a transportation problem because of the excessive weight. Berry's have licked this problem! We now offer our larger specimen evergreens growing in heavy paper pots filled with shredded organic matter—the same rich fertile growing media found in Wisconsin's large forests. We can now give you all the benefits of balled in earth trees but at a fraction of the cost and prepaid direct to you. Landscape your home at only a fraction of the usual cost with plants that are sure to grow.

EN100—SPREADING YEW

(*Taxus Cuspidata*) A bushy, spreading type yew with attractive rich-green foliage, extremely hardy, and easy to grow in shade or sun. Excellent for rockeries, or in foundation plantings in front of the taller type evergreens. Berry's 12-15 in. specimen bushes are 4 yrs. old, twice transplanted Wisconsin grown to assure you of the hardest, disease free stock. Part of new growth should be pruned every year to thicken and shape the trees. Available in both potted and bare root quality.

EN101—UPRIGHT YEW

(*Taxus Hicksi*) A distinct columnar type with upright branches and radically spreading foliage. Ideal for shady areas. Easily pruned to any desired form—globe, column or as a hedge. Dark, waxy-green foliage retains its rich color all winter. Part of new growth should be pruned every year to thicken the branches. Potted specimens are 4 yr. old, twice transplanted, 12-15 in. stock.

EN102—PFITZER'S JUNIPER

(*Juniperus Pfitzeriana*) The popular favorite of all Junipers. Striking, bluish-green fine foliage, retains its color all winter long. Spreading, graceful but irregular branches, grow almost horizontally. They thrive in almost any location and are extremely hardy. Excellent for entrance or other foundation planting. Healthy specimens, 12-15 inches high, with at least 12 in. spread, potted in rich organic mulch.

EN103—PYRAMIDAL ARBORVITAE

(*Thuja Occidentalis Pyramidalis*) Splendid columnar shaped tree with dense, frond-like evergreen foliage. Can be trimmed to any desired height. Berry's select, potted specimen are 4 yr. old, twice transplanted 15-18 in high. Excellent for accent plantings.

EN104—COLORADO BLUE SPRUCE

(*Picea Pungens Glauca*) The most beautiful of all the evergreens. Perfect shape, heavy rich glistening blue foliage, very decorative. A beautiful specimen planting for any lawn, and one that will increase in beauty and value year after year. Berry's potted, sheared specimens are 12-15 in. high. No root crowding in our special organic mulch and no transplanting shock.

EN105—HORIZONTAL JUNIPER

(*Juniperus Horizontalis*) A low creeping type evergreen, excellent for use near steps, for rockeries or as bank cover plantings. Seldom do they exceed 10-12 in. in height. Very hardy and their rich green color never fades, even in the coldest areas. Our sturdy, heavy stock is shipped to you in individual containers already packed in natural organic mulch, guaranteed to reach you in perfect condition. Strong 12 in. spread specimens.

EN106—BLACK HILLS SPRUCE

(*Picea albertiana*) A favorite, single specimen lawn planting. Extremely hardy, sturdy strain. Charming, uniform conical shape, with foliage ranging from green to blue-green. They develop into heavy bodied trees and will at maturity grow to 40 ft. or more. Excellent for wind-break planting. Potted, 12-15 in. specimen trees.

PRICES POTTED EVERGREENS:

Each \$2.49; 3 for \$6.98 POSTPAID.

PRICES BARE ROOT EVERGREENS:

Each \$1.29; 3 for \$3.39 POSTPAID.

ALL EVERGREENS SHIPPED FOR SPRING OR FALL

EN110—FOUNDATION PLANTING

A "do-it-yourself" landscape special, that will save you a lot of money. Everything you need for a beautiful foundation planting for the average size home. Included are specimen sized stock as described above, with 2 HORIZONTAL JUNIPER; 4 SPREADING PFITZER'S JUNIPER; 4 GLOBE ARBOR VITAE; and 4 AMERICAN ARBOR VITAE, ALL potted individually in our special natural forest mulch, delivered in perfect condition for planting.

All 14 for only **\$27.95 POSTPAID**. Bare root stock, same size, same assortment, only **\$12.95 POSTPAID**.

EN111—DOORWAY PLANTING

A distinctive, well-selected collection ideal for the doorway area. 2 each; PYRAMIDAL ARBOR VITAE, PFITZER'S JUNIPER AND GLOBE ARBOR VITAE. Plant as pictured with the tall, pyramidal arbor vitae in back with the globe arbor vitae in the center and the Pfitzer's on either side. Individually potted specimens, same size as described above.

All 6 for only **\$13.98 POSTPAID**. Same collection in bare-rooted stock, only **\$6.95 POSTPAID**.

MA5826—CLUMP BIRCH

(*Betula alba pendula*) A charming ornamental planting for lawn or background, particularly well suited for ranch-style homes. The clean, green leaves form a striking contrast to the white barked tree trunks. Young trees have darker bark but change to white as they mature. Excellent for shade and very easy to grow. Extremely hardy. Vigorous 3-4 ft. trees, 4 to each clump. Shipped for **Spring Planting Only**. Ea. **\$5.65**; 2 for **\$10.25 PREPAID**.

MA5735—SUNBURST LOCUST

A new, fast-growing thornless locust with bright-golden yellow leaves at the end of the charming, somewhat irregular branches. No other locust matches its superb color. It grows well in most any type soil or location, and is hardy for any area. You will be pleasantly surprised by the amazing growth these beautiful trees will make in just two or three short years. 4-5 ft. vigorous whips. Shipped **Spring or Fall**. Ea. **\$5.25**. 2 for **\$9.90 POSTPAID**.

MA5715—EUROPEAN MOUNTAIN ASH

(*Sorbus Aucuparia*) A charming, easy-to-grow ornamental shade tree, with pleasant fern-like rich green foliage. White flowers covering the tree in the spring are followed with large clusters of orange-red berries that cling all winter. The mountain ash is very hardy and thrives in most any type soil. Large 6-8 ft. sturdy stock, shipped for **Spring or Fall Planting**. Ea. **\$5.65**; 2 for **\$10.75 PREPAID**.

MA5539—HALL'S HONEYSUCKLE. A rapid growing, vining type that is excellent for both ground cover or for trellis. Fragrant gold and white flowers are produced all summer long. Long lasting, blue-green foliage adds to its charm. Deep roots and vining tendencies make it a valuable plant for controlling erosion on banks or other slopes. Plant 1 1/2'-2' apart in **Spring or Fall**. Ea. **69c**; 3 for **\$1.95**; 6 for **\$3.50 POSTPAID**.

MA5700—BECHTEL'S FLOWERING CRAB. Large 2' double flowers completely cover well-shaped compact trees in early spring. Bold pink buds open into delightfully fragrant, light pink rose type blooms. Small, bright red fruits are not edible. Trees when fully grown are seldom more than 12 ft. high. 3-4 ft. trees shipped **Spring or Fall**. Ea. **\$2.45**; 2 for **\$4.65 POSTPAID**.

MA5701—HOPA FLOWERING CRAB. (not pictured). Thousands of bright pink fragrant flowers, literally cover the trees in early spring. Clusters of small bright red apples are not only decorative but make very fine jelly. Green-maroon foliage in spring changes to rich green in early summer. Very hardy. Shipped for **Spring or Fall**. 4-5 ft. tree. Ea. **\$2.75**; 2 for **\$4.95**.

MA5704—DOUBLE FLOWERING PEACH. Magnificent double, rich-rose flowers appearing in mid-spring. Most trees bloom the first year after planting. Trees should be severely pruned every year after blooms appear and BEFORE Growth starts. Max. height 12-15 ft. Shipped for **Spring planting only**. 3-4 ft. stock. Ea. **\$1.75**; 2 for **\$3.25 POSTPAID**.

MA5725—KWANZAN FLOWERING CHERRY. The most popular, and colorful of the flowering cherries. Large, double 2" flowers, deep rose-pink color, blooming in early spring. Easy to grow and hardy through central Iowa and similar areas. Compact, upright, well-shaped trees. Max. height 20 ft. Shipped **Spring Only**. 4-5 ft. stock. Ea. **\$5.25**; 2 for **\$9.95 POSTPAID**.

STRAWBERRIES HEALTHY VIRUS FREE Guaranteed PLANTS

EVERBEARING VARIETIES

RED RICH AN4002. (Plant Patent No. 993). The best of the everbearers. Delicious, honey sweet flavor. Large, firm, red all the way through. Heavy yielder. Stays firm even after freezing. Frost resistant. Dark green, tall plants that make a beautiful garden border.

OGALLALA AN4003. A new hybrid that combines the pungent, sweet flavor of wild strawberries with the yield of the large everbearing type berry. Supply is still limited. Healthy, virus free plants. Will bear many times first year the are planted. Large, bright red berries. Minn. grown.

SUPERFECTION AN4031. Extra large round shaped berries. Solid enough for shipping. Good all-purpose variety for canning, freezing, or preserving. Extra sweet flavor. Bears from spring until early fall.

STREAMLINER AN4030. Plant this spring and get berries this summer and fall. Next year will start producing in early spring and right on through to growing season. Large sweet berries with that real strawberry flavor. Healthy virus free stock.

GEM AN4000. A dependable popular everbearing variety. Healthy, sturdy plants with plenty of strong runners. Produces well during spring, summer and until frost in the fall. Large size, extra sweet flavored berries.

Strawberries Shipped Spring or Fall

BLACKBERRIES Be sure to include a few blackberry bushes in your berry garden. They ripen right after raspberries and are delicious eaten fresh, in pies or in jams and preserves. They thrive everywhere except the very coldest area. We recommend planting in good garden soil 3 to 5 feet apart in rows 6 feet apart. Mulching always pays. In the spring, spray just before the buds open with lime sulphur or Bordeaux mixture.

EBONY KING MA6814. Superior, new heavy bearing variety. Huge glossy black-purple berries, ripen early and are deliciously flavored. Very hardy.
5 for \$2.50; 10 for \$4.75; 25 for \$10.50; 100 for \$40.00 POSTPAID.

ALFRED MA6815. Early bearing, large fine flavored berries. Practically seedless.
10 for \$1.95; 25 for \$4.25; 100 for \$15.65 POSTPAID.

ELDORADO MA6816. Late ripening but very heavy bearing. Large, glossy jet-black berries are almost coreless. Rust resistant. Very hardy.
10 for \$1.95; 25 for \$4.25; 100 for \$15.65 POSTPAID.

GARDENIA DEWBERRY MA6811. Early ripening variety with large clusters of rich, glossy berries 1-1½ inches long. Sweet, juicy and flavorful.
10 for \$2.50; 25 for \$4.95; 100 for \$17.95 POSTPAID.

THORNLESS BOYSENBERRY—MA6801

Immense, delicious berries that ripen over a period of 6 to 8 weeks. Very easy to grow, requiring little care. Planted in the spring they make a quick growth and should produce a heavy crop the following year. The fruit is a rich, red wine color, unsurpassed in flavor. Berries are often 2 inches long. Wonderful for eating fresh, for canning, or preserves. There is nothing finer than the tangy flavor of fresh Boysenberry pie. Widely adapted and will grow almost anywhere. Hardy in practically every area. Grade No. 1 bushes. Canes are practically thornless, making the berries easy to pick for Spring only. POSTPAID PRICES: 10 for \$2.60; 25 for \$5.25; 100 for \$17.50.

GOOSEBERRIES

Our bushes are all 2-yr.; field grown, grade No. 1 stock. Plant about 4 ft. apart either spring or fall. Easy to raise and require very little care, being hardy for any area. Gooseberries are delicious when used in pies, for canning or freezing.

PIXWELL MA6840. Branches have few thorns so berries are easy to pick. Large size, well flavored fruit. Hardy anywhere and easy to grow. Grade No. 1, 2 Yr. Plants. Each \$1.00; 5 for \$4.75 POSTPAID.

DOWNING MA6841. A dependable heavy bearing variety. Berries are very sweet when fully ripe—tart when green. Excellent for pies, jellies, or jams. Extremely hardy, vigorous plants. Grade No. 1, 2 yr. plants. Each \$1.00; 5 for 4.75 POSTPAID.

GOOSEBERRY GARDEN MA 6845. Sturdy, 2 year old field grown plants. Includes 2 Pixwell, 1 Downing. All 3 \$2.75 POSTPAID.

JUNE BEARING VARIETIES

DUNLAP AN4005. By far the most popular and best known variety in the midwest area. Dependable, easy to raise. Ripens early in midseason. Medium large, delicious berries. Drought resistant and self pollinizing.

BLAKEMORE AN4004. The earliest June strawberry. Very popular everywhere. Solid firm fruit ideal for canning or freezing. Wonderful for preserving too. Ripen uniformly to a brilliant red color.

ROBINSON AN4032. A heavy producing berry of extra large size. Ripens just about the time that Blakemore quits. Unsurpassed for eating fresh, preserving, or freezing. Particularly recommended for cooler areas, but will do well most anywhere. Minn. grown.

PREMIER AN4007. Our earliest ripening berry. Large sized fruit and a real favorite in the midwest. Healthy virus free plants. Long rooted and highly productive. Delicious sweet flavor.

RASPBERRIES One of the most delicious yet easiest to grow of all small fruits. Our field grown No. 1 grade plants start bearing heavily within two years. Raspberries are hardy throughout the entire country with the possible exception of extreme northern areas. Most of the red varieties are hardy for any area. A patch of 15 or 20 plants takes up very little space. We recommend planting about 3 or 4 feet apart in rows 6 feet apart, in spring or fall.

DURHAM MA6700. Bears Delicious fruit from early summer until frost. Bright red berries of medium size. Delicious served fresh with sugar and cream or in desserts. Canes seldom grow over 4 feet high.

LATHAM MA6704. Heavy producing plants with giant sized dark red berries. Extra hardy, vigorous and disease free. Midseason variety.

INDIAN SUMMER MA6705. First crop ripens in early summer and then bears another crop on new canes in the fall. Large sized, deep red berries. Should begin to bear fruit this season. If planted in the fall would start to bear fruit the following season. Delicious flavor.

DUNDEE MA6708. A sensational new black, early bearing, and with very large, sweet, black-purple fruit. Almost seedless, it is the best of the blacks for freezing, canning or dessert fresh.

BLUEBERRIES

Blueberries grow best in sandy acid soil. However, with proper care and preparation, they can be grown practically anywhere. Any soil can be made slightly acid with the addition of a little aluminum sulphate. Heavy mulching with peat moss will also have the same results. Blueberries will last many years and are hardy for practically any area.

JERSEY MA6820. Ripens mid-season. Big extra sweet light blue colored berries. Upright, vigorous growing bushes.

RUBEL MA6819. Heavy bearing, vigorous growing bushes. Extra large berries. Late maturing. We recommend including one of each variety for best results.

RANCOCCUS MA6818. Our earliest variety. Be sure to include these with any of the other varieties that you buy for a good set of berries. Excellent sweet flavored fruit for all round use.

1961 ALL-AMERICA ROSES

PINK FLOWERING ALMOND

No. 5404. A very popular and certainly one of the most beautiful flowering shrubs. Sturdy, upright branches are literally covered with bright pink, very double rosette type flowers, early in the spring. Easy to grow and hardy anywhere. Thrives in sun or part shade. Height 3 to 4 ft. Lovely green foliage. PRICES: 18-24 in., 3 for \$2.95.

2-3 ft. EACH \$1.35 POSTPAID.

EACH

MA5018 — PINK PARFAIT (Grandiflora)

This new beauty has extremely large flowers with as many as 30 in full bloom at one time on mature plants. The unusual coloring is a blend of delicate pastels changing to a rich rose-pink at the petal tips. Curled petals and shape of blooms similar to the popular Kordes Perfecta. No. 1 canes only.

Each \$3.50; 3 for \$9.30 POSTPAID.

MA5019 — DUET (Hybrid Tea)

A beautiful bi-color, warmly blending soft salmon-pink with a rich, sparkling orange-red on the under side of the petals. Duet retains its rich coloring and lovely blooms equally well in hot dry, or moist cool weather. Very free blooming, with long sturdy stems. Our choice for the best rose of 1961. No. 1 canes only.

Each \$3.50; 3 for \$9.30 POSTPAID.

Million Mums

COLORFUL, FALL-BLOOMING CUSHION MUMS

Spectacular fall beauty from early September until heavy frosts. Hundreds of brilliantly colored blooms from one single mature plant! The uniform, compact 2 ft. high plants are so full of blooms that the green foliage is hardly visible. Easy to grow and very hardy. A delightful addition for any garden. Available in 4 fall colors.

QUINTUPLET DWARF APPLE TREE

No. SN 300

Five choice varieties of fruit on one small tree! These favorite varieties include Jonathan, Yellow Transparent, Red Delicious and McIntosh. In order to produce a tree of this type our nurserymen take a sturdy, vigorous growing tree and graft the individual varieties to its limbs. The result is a true variety of each type. Strong $\frac{1}{16}$ - $\frac{1}{8}$ in. size.

WONDER BOY TOMATO

SENSATIONAL, NEW F₁ HYBRID

The very best of the new Hybrid varieties. Extra large, globular shaped fruit. Vigorous, heavy-yielding plants with strong, upright branches. Early maturing, disease resistant and easy to raise. Bright red, meaty flesh has that honest-to-goodness tomato flavor. Heavy foliage protects fruit from heat and sun-scauld. A few of these plants out-produce dozens of standard varieties.

TRIAL PACKET (30 seeds) 49c; 49c
